NEW QUESTION: 2In some instances, a financial institution may receive a warrant from law enforcement authorities to search its premises. A search warrant is a grant of permission from a court for a law enforcement agency to search certain designated premises and seize specific categories of items or information. Generally, what is the required threshold for the requesting agency to establish in order to obtain a search warrant of a financial institution?**A.** Reasonable belief**B.** A preponderance of the evidence**C.** Probable cause**D.** Clear and convincing proof**Answer: C**Explanation:ExplanationExplanation/Reference:A search warrant is a grant of permission from a court for a law enforcement agency to search certain designated premises and to seize specific categories of items or documents. Generally requesting agency is required to establish that probable cause exists to believe that evidence of a crime will be located. Warrant is authorized based on information contained in an affidavit submitted by a law enforcement officer.

NEW QUESTION: 3A Solutions Architect is building an online shopping application where users will be able to browse items, add items to a cart, and purchase the items. Images of items will be stored in Amazon S3 buckets organized by item category. When an item is no longer available for purchase, the item image will be deleted from the S3 bucket. Occasionally, during testing, item images deleted from the S3 bucket are still visible to some users. What is a flaw in this design approach?**A.** Amazon S3 DELETE requests are eventually consistent, which may cause other users to view items that have already been purchased**B.** Defining S3 buckets by item may cause partition distribution errors, which will impact performance.**C.** Amazon S3

DELETE requests apply a lock to the S3 bucket during the operation, causing other users to be blocked. Using Amazon S3 for persistence exposes the application to a single point of failure

Answer: A
