NEW QUESTION: 1 A. Option B B. Option E C. Option C D. Option A E. Option D **Answer: A,B**

Explanation: * An autoscaling solution reduces the amount of manual work involved in dynamically scaling an application. It can do this in two different ways: either preemptively by setting constraints on the number of role instances based on a timetable, or reactively by adjusting the number of role instances in response to some counter(s) or measurement(s) that you can collect from your application or from the Azure environment. Reference: Autoscaling and Microsoft Azure

NEW QUESTION: 2 A company has a two-tier application running on an Amazon EC2 server that handles all of its AWS based e-commerce activity. During peak times, the backend servers that process orders are overloaded with requests. This results in some orders failing to process. A developer needs to create a solution that will re-factor the application. Which steps will allow for more flexibility during peak times, while still remaining cost-effective? (Select TWO.) **A.** Use an Amazon SNS queue to decouple the front-end and backend servers. **B.** Modify the backend servers to pull from an Amazon SQS queue. **C.** Increase the backend T2 EC2 instance size to xl to handle the largest possible load throughout the year. **D.** Implement an Amazon SQS queue to decouple the front-end and backend servers. **E.** Migrate the backend servers to on-premises and pull from an Amazon SNS queue. **Answer: C,E**

NEW QUESTION: 3 Which of the following would be considered as a nonparametric test? I). A test to determine if two events are truly independent of each other. II). A test to determine if the variances of two populations are equal. III). A test to determine if the means of two populations are equal. IV). A test dealing with a data set that's made up of rankings, as opposed to nominal values. **A.** II and III. **B.** I and IV. **C.** I and III. **Answer: B** Explanation: Any test that deals with the mean or the variance of the population is regarded as a "parametric" test. Consequently, all other tests would be regarded as "nonparametric" tests.
