With our CTSC exam questions, you will not only get aid to gain your dreaming certification, but also you can enjoy the first-class service online, Activation Keys are version and product specific.

NEW QUESTION: 1HOTSPOTAnswer: Explanation:Case Study: 4File Tax-Related Document BackgroundYou are developing an Azure solution that individuals and small businesses will use to prepare and file tax-related documents.Business RequirementsGeneralThe solution must provide a way for customers to enter personal and demographic information. Customers must be able to upload income documents and related documents to the solution. The solution must provide reports and summary documents for customers in PDF format.Scope and Device AccessibilityThe solution must support two operational modes: On-Peak and Off-Peak. On-Peak is defined as the first quarter of a year. Off-Peak is defined as the other three quarters of a year. Customers must be able to access the solution by using desktop computers, laptop computers, mobile devices, and tablets.High Availability and Business ContinuityThe solution must be available at all times. When the solution transitions between Off-Peak mode and On-Peak mode, solution availability must not be affected. Disaster recovery must be established for the customers' stored data.DiagnosticsThe solution must log relevant diagnostic data that can be used to troubleshoot the cloud service.ScalabilityThe solution must scale out while transitioning from Off-Peak mode to On-Peak mode.CostThe solution must use cloud resources optimally to minimize operating costs.Storage and SecurityThe solution must be secure to prevent any anonymous access (including read access) to the customers' tax documents. Cross-Premises NetworkingThe solution must extend the developers' on-premises network into Azure.Technical RequirementsThe logical design for the solution is shown in the following exhibit.Platform-as-a-Service (PaaS)The solution must have two roles: a web role and worker role. The web interface of the solution uses a web role to accept and send user input and any related documents. The worker role must access the stored data and prepare the tax documents in the background.ComputeThe solution must support a minimum of 10 role instances. When the solution is in On-Peak mode, each role instance must be allocated at least 6 GB of memory. The memory can be scaled down to 3 GB when the solution is in Off-Peak mode. The solution must cache documents locally. The cache does not need to be refreshed during the lifecycle of the worker role.Role instances that are running should not be affected by topology changes such as an increase in instance count.StorageThe web role must store

documents in blob storage. A SQL database is used to store customer information. The worker role must use queues to process the final tax documents. Performance and Scalability When the solution is in Off-Peak mode, it must support at least 150 concurrent database sessions, and the maximum size of the database is 50 GB. When the solution is in On-Peak mode, it must support 750 concurrent database sessions, and the maximum size of the database is 300 GB. Geo-replication must be enabled and must be configurable by using the Azure management portal. Software Prerequisites The solution must install the software that is necessary to generate PDF documents on the server. This software will be provided as a Windows Installer package. Debugging Solution errors and warnings that occur in a web role must be logged. The worker role must log any crashdump files. Detailed information about errors and their context must be collected so that the environment in which errors occurred can be simulated locally. Security At the time that a customer's tax information and documents are accepted, the solution must send an email to the customer. The email contains a secure hyperlink that the customer can use to upload any additional necessary documents. The customer is asked to upload these documents within 48 hours. If the customer does not upload the documents within 48 hours, the solution should not issue a new hyperlink. The solution must send an email to the customer to remind the customer to use the original hyperlink to upload any additional necessary documents. Network Services The solution must use a cross-premises secure network. The network must be configurable by using the Azure management portal. Social Structure Relevant portions of the solution files are shown in the following code segments. Line numbers in the code segments are included for reference only and include a two-character prefix that denotes the specific file to which they belong.

NEW QUESTION: 2 Firewall supports three main VPDN VPN, namely, L2TP, PPTP, IPSec: **A. False**
B. True **Answer: A**

NEW QUESTION: 3 What happens when you define Workforce Compensation Plan components but the employees to whom the compensation change is being administered does not have any component in his or her salary? (Choose the best answer.) **A.** The first component is automatically mapped to the salary and the amount associated with this component is posted as a salary adjustment to the employee record. **B.** The component adjustment is not posted as a salary adjustment to the employee's record. While designing the compensation plan, it has to be kept in mind that the plan components must have a direct mapping with the employee's salary components. **C.** The last component is automatically mapped to the salary and the amount associated with this component is posted as a salary adjustment to the employee record. **D.** The sum of all components identified to be posted as salary is posted as a single salary adjustment amount to the employee's salary record. **Answer: C**

NEW QUESTION: 4 The following SAS program is submitted: `data work.retail; cost = '20000'; total = .10 * cost; run;` What is the result? **A.** The value of the variable TOTAL in the output data set is 2000. No messages are written to the SAS log. **B.** The variable TOTAL in the output data set has no value. The program fails to execute due to a syntax error. **C.** The value of the variable TOTAL in the output data set is 2000. A note that conversion has taken place is written to the SAS log. **D.** The value of the variable TOTAL in the output data set is missing. An error message is written to the SAS log. **Answer: D**
