NEW QUESTION: 4 DRAG DROP You are editing a SQL Server Integration Services (SSIS) package that uses checkpoints. The package performs the following steps: 1 . Download a sales transaction file by using FTP. 2 . Truncate a staging table. 3 . Load the contents of the file to the staging table. 4 . Merge the data with another data source for loading to a data warehouse. The checkpoints are currently working such that if any of the four steps fail, the package will restart from the failed step the next time it executes. You need to modify the package to ensure that if either the Truncate Staging Table or the Load Sales to Staging task fails, the package will always restart from the Truncate Staging Table task the next time the package runs. Which three steps should you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)
