NEW QUESTION: 1 Nach einer Planungssitzung wurde ein neues Projekt gestartet. Das Projekt steht unter direkter Aufsicht einer Führungskraft in der Organisation. Nach einem Besprechungstreffen hört der Projektmanager, wie eine Führungskraft von einem der Teammitglieder ein Dashboard anfordert, um den Gesamtprojektstatus anzuzeigen. Was soll der Projektmanager tun?
A. Bitten Sie das Teammitglied, die Anforderung über den Projektmanager weiterzuleiten
B. Aktualisieren Sie den Kommunikationsverwaltungsplan, um informelle Anforderungen einzuschließen
C. Aktualisieren Sie die Bewertungsmatrix für das Stakeholder-Engagement
D. Bitten Sie das Teammitglied, ein Dashboard zu entwickeln, um die Anforderung zu erfüllen.
Answer: A

NEW QUESTION: 2 You have completed a repair on a LaserJet printer. After testing and verifying the solution, you have determined that the issue is a result of the customer's implementation of the printer. What will your next step be?
A. Provide the customer with informational white papers explaining the issues.
B. Advise the customer that the service call will be billable.
C. Politely recommend changes in the printer's use or maintenance to the customer that may prevent future failures.
D. Advise your sales department to contact the customer to resolve this situation.
Answer: C

NEW QUESTION: 3 CORRECT TEXT *****host A 192.168.201.1*host B 192.168.201.2*host C 192.168.201.3*host D 192.168.201.4**
Answer: Explanation: Please check the below explanation for all details. Explanation: We should create an access-list and apply it to the interface that is connected to the ServerLAN because it can filter out traffic from both S2 and Core networks. To see which interface this is, use the "show ip interface brief" command: From this, we know that

the servers are located on the fa0/1 interface, so we will place our numbered access list here in the outbound direction. Corp1#configure terminal Our access-list needs to allow host B - 192.168.125.2 to the Finance Web Server 172.22.109.17 via HTTP (port 80), so our first line is this: Corp1(config)#access-list 100 permit tcp host 192.168.125.2 host 172.22.109.17 eq 80 Then, our next two instructions are these: *Other types of access from host B to the Finance Web Server should be blocked. *All access from hosts in the Core or local LAN to the Finance Web Server should be blocked. This can be accomplished with one command (which we need to do as our ACL needs to be no more than 3 lines long), blocking all other access to the finance web server: Corp1(config)#access-list 100 deny ip any host 172.22.109.17 Our last instruction is to allow all hosts in the Core and on the local LAN access to the Public Web Server (172.22.109.18) Corp1(config)#access-list 100 permit ip host 172.22.109.18 any Finally, apply this access-list to Fa0/1 interface (outbound direction) Corp1(config)#interface fa0/1 Corp1(config-if)#ip access-group 100 out Notice: We have to apply the access-list to Fa0/1 interface (not Fa0/0 interface) so that the access-list can filter traffic coming from both the LAN and the Core networks. To verify, just click on host B to open its web browser. In the address box type http://172.22.109.17 to check if you are allowed to access Finance Web Server or not. If your configuration is correct then you can access it. Click on other hosts (A, C and D) and check to make sure you can't access Finance Web Server from these hosts. Then, repeat to make sure they can reach the public server at 172.22.109.18. Finally, save the configuration Corp1(config-if)#end Corp1#copy running-config startup-config
