NEW QUESTION: 3 You work as the Sales Manager at ABC.com. You are using Microsoft Office Excel 2010 to create a workbook. The workbook will be used to track deployments of the company's product to customers. The workbook will be updated by members of the deployment team and by other users in the Sales department. You need to restrict the type of information that users can enter into the workbook. You want to ensure that customer's names are spelt correctly by using a list for users to select from and you want to limit the cells that

users can enter numbers into. You also want users to be presented with a message when they enter invalid data. Which function of Excel should you use? **A.** You should use the Protect Workbook function on the Review tab. **B.** You should use the Format function on the Home tab. **C.** You should use the Data Consolidation function on the Data tab. **D.** You should use the Data Validation function on the Data tab. **Answer: D**

NEW QUESTION: 4 Your company plans to use Office 365 and Microsoft SharePoint Online. Another employee provisions the company's Office 365 tenant. You discover that the employee can create and manage SharePoint site collections. You need to prevent the employee from creating or managing site collections. From which role should you remove the employee? **A.** Global administrator **B.** SharePoint Online administrator **C.** Service administrator **D.** Site collection administrator **Answer: A** Explanation: The question states that "Another employee provisions the company's Office 365 tenant". The person who provisions an Office 365 tenant will automatically be assigned to the Global administrator role. In Office 365, a Global administrator is also a SharePoint Online administrator. We could prevent the employee from creating or managing site collections by removing the employee from the SharePoint Online administrator role. However, as a Global Administrator, the employee could add himself/herself back to the SharePoint Online administrator role. Therefore, we should remove the employee from the Global Administrator role.
