NEW QUESTION: 1 Refer to the exhibit. An administrator is attempting to register a Cisco TelePresence endpoint to a Cisco VCS. The Cisco VCS uses local authentication and a single username for all endpoints. Where is the first place that the administrator should go to resolve the issue?
A. VCS > Configuration > Authentication > Devices > Local Database
B. Endpoint > Configuration > System Configuration > Profile 1 > Authentication
C. VCS > Configuration > Registration > Allow List
D. Endpoint > Configuration > System Configuration > SIP > Profile 1 > Authentication
E. VCS > Configuration > Registration > Deny List
F. VCS > Configuration > Authentication > Outbound Connection Credentials
Answer: D

NEW QUESTION: 2 You are the data steward for a Business Intelligence project. You must identify duplicate rows stored in a SQL Server table and output discoveries to a CSV file. A Data Quality Services (DQS) knowledge base has been created to support this project. You need to produce the CSV file with the least amount of development effort. What should you do?
A. Create a Master Data Services (MDS) model.
B. Create a Data Quality Project.
C. Create an Integration Services package and use a DQS Cleansing transform.
D. Create an Integration Services package and use a Fuzzy Lookup transform.
E. Create an Integration Services package and use a Fuzzy Grouping transform.
Answer: C
Explanation: The DQS Cleansing transformation uses Data Quality Services (DQS) to correct data from a connected data source, by applying approved rules that were created for the connected data source or a similar data source. To determine whether the data has to be corrected, the DQS Cleansing transformation processes data from an input column when the following conditions are true:
*The column is selected for data correction.
*The column data type is supported for data correction.
*The column is mapped a domain that has a compatible data type.
*The transformation also includes an error output that you configure to handle row-level errors

NEW QUESTION: 3 The IT Security department wants to prevent all versions of a particular file sharing application from running on company computers. Where must the software resource be defined before it can be prevented from running?
A. Software Catalog
B. Software Inventory scan
C. Software Library
D. Software Update policy
Answer: D

NEW QUESTION: 4 The BEST method for assessing the effectiveness of a business continuity plan is to review the:
A. emergency procedures and employee training.
B. offsite storage and environmental controls.
C. results from previous tests.
D. plans and compare them to appropriate standards.
Answer: C
Explanation: Previous test results will provide evidence of the effectiveness of the business continuity plan. Comparisons to standards will give some assurance that the plan addresses the critical aspects of a business continuity plan but will not

reveal anything about its effectiveness. Reviewing emergency procedures, offsite storage and environmental controls would provide insight into some aspects of the plan but would fall short of providing assurance of the plan's overall effectiveness.
