ChromeOS-Administrator Reliable Study Questions - Your Trusted Partner to Pass Professional ChromeOS Administrator Exam

Our pass guide contains valid ChromeOS-Administrator test questions and accurate answers with detailed explanations, The ChromeOS-Administrator training vce which designed by our website can help you pass the exam the first time.

As long as you study our ChromeOS-Administrator training engine and follow it step by step, we believe you will achieve your dream easily, In addition, study with the help of the useful ChromeOS-Administrator free practice vce may be a good method to make your dream come true in short time.

Please keep focus on our ChromeOS-Administrator dumps vce, And even you free download the demos on the website, you can feel the convenience and efficiency, Our ChromeOS-Administrator exam questions are designed to stimulate your interest in learning so that you learn in happiness.

Choose ChromeOS-Administrator latest torrent questions, you will never regret for your decision, To customers around the world, we share the totally common belief that is buying valuable products of great quality with less money.

Their quality is much higher than the quality of any other materials, and questions and answers of ChromeOS-Administrator training materials contain information from the best available sources.

Quality stands as the first priority to Photoexperienceacademy, [1z1-076 Exam Engine](#) Photoexperienceacademy's testing engine is a worthwhile product for all certification candidates, If you have passed ChromeOS-Administrator exam on our practice exam software, you are going to pass the ChromeOS-Administrator exam on the first attempt.

NEW QUESTION: 1 If a customer does not require high backup performance and the application type on production server is as the same as it on the management server, it is not necessary to deploy an independent media server in a data backup management system. Instead, a media server module can be installed together with a management server module on the same physical server.**A. FALSE B. TRUE****Answer: B**

NEW QUESTION: 2 Testlet 2 Case study This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided. To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study. At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section. To start the case study To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. If the case study has an All Information tab, note that the information displayed is identical to the information displayed

on the subsequent tabs. When you are ready to answer a question, click the Question button to return to the question.

Overview Contoso, Ltd. is a manufacturing company that has offices worldwide. Contoso works with partner organizations to bring products to market. Contoso products are manufactured by using blueprint files that the company authors and maintains.

Existing Environment Currently, Contoso uses multiple types of servers for business operations, including the following:

- File servers
- Domain controllers
- Microsoft SQL Server servers

Your network contains an Active Directory forest named contoso.com. All servers and client computers are joined to Active Directory. You have a public-facing application named App1. App1 is comprised of the following three tiers:

- A SQL database
- A web front end
- A processing middle tier

Each tier is comprised of five virtual machines. Users access the web front end by using HTTPS only.

Requirements Planned Changes Contoso plans to implement the following changes to the infrastructure:

- Move all the tiers of App1 to Azure.
- Move the existing product blueprint files to Azure Blob storage.
- Create a hybrid directory to support an upcoming Microsoft Office 365 migration project.

Technical Requirements Contoso must meet the following technical requirements:

- Move all the virtual machines for App1 to Azure.
- Minimize the number of open ports between the App1 tiers.
- Ensure that all the virtual machines for App1 are protected by backups.
- Copy the blueprint files to Azure over the Internet.
- Ensure that the blueprint files are stored in the archive storage tier.
- Ensure that partner access to the blueprint files is secured and temporary.
- Prevent user passwords or hashes of passwords from being stored in Azure.
- Use unmanaged standard storage for the hard disks of the virtual machines.
- Ensure that when users join devices to Azure Active Directory (Azure AD), the users use a mobile phone to verify their identity.
- Minimize administrative effort whenever possible.

User Requirements Contoso identifies the following requirements for users:

- Ensure that only users who are part of a group named Pilot can join devices to Azure AD.
- Designate a new user named Admin1 as the service admin for the Azure subscription.
- Admin1 must receive email alerts regarding service outages.
- Ensure that a new user named User3 can create network objects for the Azure subscription.

HOTSPOT You need to configure the Device settings to meet the technical requirements and the user requirements. Which two settings should you modify? To answer, select the appropriate settings in the answer area.

Answer: Explanation:

NEW QUESTION: 3 Your company has decided that all passwords chosen by users must contain at least two capital letters and one number. Which file should you change to implement this policy?

A. /etc/shadow **B.** /etc/default/passwd **C.** /etc/default/shadow **D.** /etc/passwd

Answer: B

NEW QUESTION: 4 cipher /a /d /s:<protected share name>

A. Option B **B.** Option A **Answer: A**

Explanation: Explanation If you plan to remove Active Directory Rights Management Services from your organization, you should first decommission the AD RMS cluster. This allows your AD RMS users to remove AD RMS protection from existing content. If you uninstall AD RMS without first decommissioning it, your protected content will no longer be accessible.

Reference: Decommissioning AD RMS
<http://blogs.technet.com/b/rms/archive/2012/04/29/decommissioning-ad-rms.aspx>
