It is time for you to plan your life carefully, As long as you choose Databricks-Certified-Professional-Data-Engineer real exam, we will be responsible for you in the end.

NEW QUESTION: 1 Consider the following decision table, How many cases are left when this decision table is collapsed?[K3] 3 credits **A. 0B. 1C. 2D. 3****Answer: D**

NEW QUESTION: 2 DRAG DROP You need to implement a new version of usp_AddMobileLocation. Develop the solution by selecting and arranging the required code blocks in the correct order. You may not need all of the code blocks.**Answer:** Explanation: Explanation: Box 1:Box 2:Box 3:Box 4:Box 5:Box 6:Note:* From scenario:The mobile application will need to meet the following requirements:* Update the location of the user by using a stored procedure named usp_AddMobileLocation.* DELAYED_DURABILITY SQL Server transaction commits can be either fully durable, the SQL Server default, or delayed durable (also known as lazy commit). Fully durable transaction commits are synchronous and report a commit as successful and return control to the client only after the log records for the transaction are written to disk. Delayed durable transaction commits are asynchronous and report a commit as successful before the log records for the transaction are written to disk. Writing the transaction log entries to disk is required for a transaction to be durable. Delayed durable transactions become durable when the transaction log entries are flushed to disk.

NEW QUESTION: 3 Which term BEST describes a practice used to detect fraud for users or a user by forcing them to be away from the workplace for a while?**A. Job RotationB. Least Privilege PrincipleC. Mandatory VacationsD. Obligatory Separation****Answer: C** Explanation: Discussion: Mandatory vacations are used to detect fraud by individuals who conceal their fraudulent activities but are unable to do so while they are on vacation. Replacement workers undertake the original worker's position and are in a good position to detect and uncover fraud of that person's position. The following answers are incorrect: -Least Privilege: This is a good term to know but not a correct answer here. Least Privilege principle means that users are only given access to a small set of data so as to prevent mass theft or damage by malware using their account. -Obligatory Separation: This isn't a valid term, sorry. -Job Rotation: This isn't the correct answer but it is a good term with which to be familiar. Job rotation is where employees are moved from position to position to detect and mitigate fraud. The following reference(s) was used to create this question: 2013. Official Security+ Curriculum.
