Once you received our 156-607 practice test online, you just need to spend one or two days to practice questions and remember the answers, Some tips & Notice, Q: How often are the exam files updated?

Our expert team guarantees that each answer and question is useful and valuable.

NEW QUESTION: 1 Which statement about the Linux OS for IP Office is true? **A.** The IP Office for Linux software is provided as a single DVD orderable from Avaya, or downloaded to a USB Stick. **B.** The Linux OS must be installed prior to beginning the IP Office Server Edition installation. **C.** All initial IP Office system configurations must be completed via the Linux command line. **D.** The base operating system installed is DOS. **Answer: A** Explanation: Explanation References: <https://downloads.avaya.com/css/P8/documents/100175282> Page: 15

NEW QUESTION: 2 A company is using AWS to run an internet-facing production application written in Node.js. The Development team is responsible for pushing new versions of their software directly to production. The application software is updated multiple times a day. The team needs guidance from a Solutions Architect to help them deploy the software to the production fleet quickly and with the least amount of disruption to the service. Which option meets these requirements? **A.** Prepackage the software into an AMI and then use Auto Scaling to deploy the production fleet. For software changes, update the AMI and allow Auto Scaling to automatically push the new AMI to production. **B.** Use AWS Elastic Beanstalk to host the production application. For software changes, upload the new application version to Elastic Beanstalk to push this to the production fleet using a blue/green deployment method. **C.** Deploy the base AMI through Auto Scaling and bootstrap the software using user data. For software changes, SSH to each of the instances and replace the software with the new version. **D.** Use AWS CodeDeploy to push the prepackaged AMI to production. For software changes, reconfigure CodeDeploy with new AMI identification to push the new AMI to the production fleet. **Answer: B**

NEW QUESTION: 3 A System Administrator is Planning to implement SSL Inspection for both outbound user traffic and inbound traffic to a company's public-facing web server. The requirements are as follows: * Avoid having to push certificates to all workstations * Protect users from fraudulent web sites * Protect all internal servers from malicious attacks The steps to implement this plan are as follows: * Obtain an SSL Inspection license for the XGS * Obtain a certificate from a public CA and upload it to the XGS via Outbound SSL Certificates * Obtain the certificate and private key of the internal public-facing web server and upload it to the XGS via Inbound SSL Certificates * Configure Outbound SSL Inspection Settings to block connections if the server certificate is invalid or self-signed * Create Outbound SSL Inspection rules that inspect all traffic * Create Inbound SSL Inspection rules that only decrypt traffic destined for the internal web server IP address After implementing the plan, the System Administrator finds that users are blocked when trying to access the private company intranet site. What should the System Administrator do to allow the users to access the intranet? **A.** Add an inbound SSL Inspection rule to ignore the traffic to the intranet site **B.** Add intranet CA certificates to Trusted Certificate Authorities **C.** Add intranet CA certificates to the Inbound SSL Certificates store **D.** Disable the self-signed certificate option in Outbound SSL Inspection Settings **Answer: C**
