Our company devoted ourselves to providing high-quality 1z0-1084-23 pdf vce to our customers since ten years ago, Up to now, our Oracle Cloud study guide has never been complained by our customers.

Why do I recommend this study material to you, Professional payment protection, Your Oracle Cloud Infrastructure 2023 Developer Professional 1z0-1084-23 success is guaranteed, Considering the inexperience of most candidates, we provide some free trail for our customers to have a basic knowledge of 1z0-1084-23 guide torrent: Oracle Cloud Infrastructure 2023 Developer Professional and get the hang of how to achieve the Oracle certification in their first attempt.

By the way they are easy to comprehend and learn whichever degree you are now.

NEW QUESTION: 1Note: This question is part of a series of questions that use the same scenario. For your convenience, the scenario is repeated in each question. Each question presents a different goal and answer choices, but the text of the scenario is exactly the same in each question in this series.You have a database that contains the following tables: BlogCategory, BlogEntry, ProductReview, Product, and SalesPerson. The tables were created using the following Transact SQL statements:You must modify the ProductReview Table to meet the following requirements:* The table must reference the ProductID column in the Product table* Existing records in the ProductReview table must not be validated with the Product table.* Deleting records in the Product table must not be allowed if records are referenced by the ProductReview table.* Changes to records in the Product table must propagate to the ProductReview table.You also have the following database tables: Order, ProductTypes, and SalesHistory, The transact-SQL statements for these tables are not available.You must modify the Orders table to meet the following requirements:* Create new rows in the table without granting INSERT permissions to the table.* Notify the sales person who places an order whether or not the order was completed.You must add the following constraints to the SalesHistory table:* a constraint on the SaleID column that allows the field to be used as a record identifier* a constant that uses the ProductID column to reference the Product column of the ProductTypes table* a constraint on the CategoryID column that allows one row with a null value in the column* a constraint that limits the SalePrice column to values greater than four Finance department users must be able to retrieve data from the SalesHistory table for sales persons where the value of the SalesYTD column is above a certain threshold.You plan to create a memory-optimized table named SalesOrder. The table must meet the following requirements:* The table must hold 10 million unique sales orders.* The table must use checkpoints to minimize I/O operations and must not use transaction logging.* Data loss is acceptable.Performance for queries against the SalesOrder table that use Where clauses with exact equality operations must be optimized.You need to create the Sales Order tableHow should you complete the table definition? To answer? select the appropriate Transact-SQL segments in the answer area.**Answer:** Explanation:ExplanationBox 1: NONCLUSTERED HASHWITH (BUCKET_COUNT = 10000000)Hash index is preferable over a nonclustered index when queries test the indexed columns by use of a WHERE clause with an exact equality on all index key columns. We should use a bucket count of 10 million.Box 2: SCHEMA_ONLYDurability: The value of SCHEMA_AND_DATA indicates that the table is durable, meaning that changes are persisted on disk and survive restart or failover. SCHEMA_AND_DATA is the default value.The

value of SCHEMA_ONLY indicates that the table is non-durable. The table schema is persisted but any data updates are not persisted upon a restart or failover of the database. DURABILITY=SCHEMA_ONLY is only allowed with MEMORY_OPTIMIZED=ON. References: <https://msdn.microsoft.com/en-us/library/mt670614.aspx>

NEW QUESTION: 2 Post Data migration below questions needs to be addressed: There are 2 correct answers to this question. Response: **A.** Should we archive source system? **B.** Should we keep source system? **C.** Approach to maintain data in SAP? **D.** All the above **Answer: B,C**

NEW QUESTION: 3 A 10 layer building need to cover the WLAN signal, as for the floor block, WLAN signal frequency of 5 or 6 layers can be set to 6 channel at the same time. **A.** False **B.** True **Answer: A**
