To let you have a general idea about the shining points of our training NCP-DB Certification Questions materials I would like to list three of the advantages of our training for you, Re-visit and confirm difficult questions.

It means all users get the latest and updated Nutanix NCP-DB practice material to clear the NCP-DB Nutanix Certified Professional - Database Automation (NCP-DB) v6.5 certification test on the first try, Second, in terms of content, we guarantee that the content provided by our NCP-DB study materials is the most comprehensive.

It will clean all obstacles on your way.

NEW QUESTION: 1View the Exhibit.The file came from your Automated Installer (AI) install server. The file is _____.**A.** the default AI config file for non-global zones**B.** the default AI manifest for non-global zones**C.** a custom AI manifest**D.** an AI SC profile for non-global zones

Answer: CExplanation:ai_manifest-Automated installation manifest file formatSynopsis /usr/share/install/ai.dtd.1Some customizations have been made, such as the selection of specific locales.Reference: Oracle Solaris 11 Installation Man Pages

NEW QUESTION: 2You just developed a policy model and need to test a discrete portion of the rules without using screens.Identify the correct process.**A.** Go to Debug > Data > and set the entity and attribute values that you want to test in the Oracle Policy Modeling Debugger window.**B.** Go to Build > Build and Debug and select Build and Debug without screens in the Oracle Policy Modeling Testing window.**C.** Go to Build > Test Data Model and enter the discrete portion of the rules that you want to test and assign values.**D.** Go to Test > Discrete data Sets > and set the entity and attribute values that you want to test in the Rule Testing window.

Answer: D

NEW QUESTION: 3

Subscription1という名前のAzureサブスクリプションと、Tenant1という名前の関連付けられたAzure Active Directory (Azure AD) テナントを作成します。

Tenant1には、次の表のユーザーが含まれています。Azure AD Privileged Identity ManagementアプリケーションをTenant1に追加する必要があります。

どのアカウントを使用できますか？**A.** [email#160;protected]**B.** [email#160;protected]**C.** [email#160;protected]**D.** [email#160;protected]

Answer: BExplanation:For Azure AD roles in Privileged Identity Management, only a user who is in the Privileged role administrator or Global administrator role can manage assignments for other administrators. You can grant access to other administrators to manage Privileged Identity Management. Global Administrators, Security Administrators, Global readers, and Security Readers can also view assignments to Azure AD roles in Privileged Identity Management.Only owner can create an subscription and only global administrator can perform Privileged Identity Management changes. So you can create subscription with external user and then promote him to global

administrator to get things done. As it is mentioned as it is associated with azure tenant so that tenant has an AD domain. So in azure AD the default domain ends with onmicrosoft.com. So you can't have Hotmail IDs there. Moreover always remember the principle of least privileges, when you can get your job done with Global Administrator then you should not look for owner for security purpose. [email#160;protected] : Correct Choice As Admin1 is Global Administrator and part of default AD domain so Admin1 can add an Azure AD Privileged Identity Management application to Tenant1 [email#160;protected] : Incorrect Choice As per the above explanation Admin3 is not Global Administrator, so this option is incorrect. [email#160;protected] : Incorrect Choice As per the above explanation Admin2 is not Global Administrator, so this option is incorrect. [email#160;protected] : Incorrect Choice Although this user is Global Administrator but referring to the least privileges principal and default domain consideration this option is incorrect. References:

<https://docs.microsoft.com/en-us/azure/active-directory-domain-services/tutorial-create-instance>

NEW QUESTION: 4 Refer to the exhibit. What must be configured on the HQ Cisco Unified Communications Manager to allow HQ users to dial the SAF learned directory number pattern 3XXX? **A.** The SAF partition assigned to the SAF learned patterns must be available to the HQ phone users through the phone CSS. **B.** The SAF directory number pattern 3XXX will be made available to all users automatically as soon as the SAF partition is selected. **C.** Route pattern 3XXX should be configured and made available to HQ phone users through the phone AAR CSS. **D.** The SAF partition assigned to the SAF learned patterns must be available to the HQ phone users through the phone AAR CSS. **E.** Route pattern 3XXX should be configured and made available to HQ users through the phone CSS. **Answer: A** Explanation: By adopting the SAF network service, the call control discovery feature allows Cisco Unified Communications Manager to advertise itself along with other key attributes.
