Responsibilities p) The person chosen to represent a particular viewpoint and role. q) The person who decides on the execution of inspections and determines if the inspection objectives have been met. r) The person who leads the inspection of a document or set of documents. s) The person who documents all the issues, problems and open points. **A.** 1Q, 2P, 3S, 4R **B.** 1Q, 2S, 3P, 4R **C.** 1R, 2S, 3P, 4Q **D.** 1R, 2P, 3S, 4Q
Answer: C

NEW QUESTION: 2 **A.** Option C **B.** Option B **C.** Option A **D.** Option D **Answer: B** Explanation: A configuration manager agent is required to store information about Windows update installation in the Configuration Manager reports.
<http://technet.microsoft.com/en-us/library/gg712312.aspx> Step 1: Install and Configure a Software Update Point The software update point is required on the central administration site and primary sites to enable software updates compliance assessment and to deploy software updates to clients. The software update point is optional on secondary sites. The software update point site system role must be created on a server that has WSUS installed. The software update point interacts with the WSUS services to configure software update settings and request synchronization of software updates metadata. When you have a Configuration Manager hierarchy, install and configure the software update point on the central administration site first, then on child primary sites, and then optionally on secondary sites. When you have a stand-alone primary site (no central administration site), install and configure the software update point on the primary site first, and then optionally on secondary sites. Some settings are only available when you configure the software update point on a central administration site, or stand-alone primary site, and there are different options that you must consider depending on where the software update point is installed.
