Q: Do I Get All The Updates For Life, As long as you carefully study the questions in the dumps, all problems can be solved, Just starting study with JN0-683 dumps torrent, you will be on the way to success.

We have unique advantages on study guide materials, In addition to that we have brought out the APP online version of JN0-683 real questions without limits on numbers of electronic equipment and suitable for all.

**NEW QUESTION: 1** WWW wanderers or spiders are programs that traverse many pages in the World Wide Web by recursively retrieving linked pages. Search engines like Google, frequently spider web pages for indexing. How will you stop web spiders from crawling certain directories on your website?  
**A.** Place authentication on root directories that will prevent crawling from these spiders  
**B.** Enable SSL on the restricted directories which will block these spiders from crawling  
**C.** Place "HTTP:NO CRAWL" on the html pages that you don't want the crawlers to index  
**D.** Place robots.txt file in the root of your website with listing of directories that you don't want to be crawled  
**Answer: D**

**NEW QUESTION: 2** A. Option C B. Option D C. Option A D. Option B  
**Answer: A**

**NEW QUESTION: 3** A manager tells the network engineer to permit only certain VLANs across a specific trunk interface. Which option can be configured to accomplish this?  
**A.** VACL  
**B.** L2P tunneling  
**C.** allowed VLAN list  
**D.** VTP pruning  
**Answer: C**  
Explanation: Explanation/Reference:  
Explanation: When a trunk link is established, all of the configured VLANs are allowed to send and receive traffic across the link. VLANs 1 through 1005 are allowed on each trunk by default. However, VLAN traffic can be removed from the allowed list. This keeps traffic from the VLANs from passing over the trunk link. Note: The allowed VLAN list on both the ends of the trunk link should be the same. For Integrated Cisco IOS Software based switches, perform these steps:  
1. To restrict the traffic that a trunk carries, issue the switchport trunk vlan-list interface configuration command. This removes specific VLANs from the allowed list. Reference: <https://supportforums.cisco.com/document/11836/how-define-vlans-allowed-trunk-link>
