NEW QUESTION: 1You are working in a policy model in which the entity "the parent" has a one-to-many relationship ("the parent's children") with the entity "the child". You need to develop a rule that proves the attribute "the parent has put all of the kids to bed", based on the attribute "the child is in bed".Which is the correct rule?**A.** Option **AB.** Option **CC.** Option **DD.** Option **B****Answer: D**

NEW QUESTION: 2Click the Exhibit button.An upsert enabled stream has five columns as shown in Part 1 in the exhibit. What will be the contents of V1 if the data shown in Part 2 of the exhibit is fed to the stream?**A.** Option **AB.** Option **CC.** Option **DD.** Option **B****Answer: A**

NEW QUESTION: 3A student developer has created a new library of math functions to share with friends in a linear algebra class. The developer is having difficulty getting people to come over to the dorm to see the new code library, so he decides to deploy it as a Web service so that everyone can enjoy the features via the Internet. One of the functions has this WSDL definition:
<portType name="MyMathLib"><operation name="incCtr"><input message="tns:incCtr"/></operation></ portType>Which two statements are true about this Web service? (Choose two.)**A.** This indicates a one-way message exchange pattern**B.** This is an asynchronous receive.**C.** It must NOT send a SOAP fault back to the sender.**D.** It must send a SOAP fault back to the sender.**E.** The client must use SOAPFaultException to display any errors.**Answer: A,C**

NEW QUESTION: 4**A.** Option **AB.** Option **CC.** Option **DD.** Option **B****Answer: C****Explanation:** ExplanationAccess-based Enumeration is a new feature included with Windows Server 2003 Service Pack 1. This feature based file servers to list only the files and folders to which they have allows users of Windows Server 2003 access when browsing content on the file server. This eliminates user confusion that can be caused when users connect to a file server and encounter a large number of files and folders that they cannot access.Access-based Enumeration filters the list of available files and folders on a server to include only those that the requesting user has access to. This change is important because this allows users to see only those files and directories that they have access to and nothing else. This mitigates the scenario where unauthorized users might otherwise be able to see the contents of a directory even though they don't have access to it.
