You can use the version you like and which suits you most to learn our D-RP-OE-A-24 test practice materials, Moreover, we have free demo for D-RP-OE-A-24 exam materials for you to have a general understanding of the product.

**NEW QUESTION: 1** A backup administrator has replicated a virtual machine between two Hyper-V hosts and now would like to automatically verify the recoverability of the replica. What would they need to do?  
**A.** Create a virtual lab and an application group; create a SureBackup for the replica job and run it once a day  
**B.** Start the virtual machine manually using the universal application item recovery wizard  
**C.** Create a virtual switch with no uplinks and start the virtual machine connected to the new switch  
**D.** It is not supported to perform SureBackup replica testing for Hyper-V  
**Answer: D**

**NEW QUESTION: 2** どの機能がデータの形式を検証しますか？  
**A.** ISNEW  
**B.** REGEXC  
**C.** IFD  
**D.** ケース  
**Answer: B**

**NEW QUESTION: 3** You have an Azure subscription named Subscription1. Subscription1 contains the resources in the following table. In Azure, you create a private DNS zone named adatum.com. You set the registration virtual network to VNet2. The adatum.com zone is configured as shown in the following exhibit. For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.  
**Answer:** Explanation: Explanation: Box 1: No Azure DNS provides automatic registration of virtual machines from a single virtual network that's linked to a private zone as a registration virtual network. VM5 does not belong to the registration virtual network though. Box 2: No Forward DNS resolution is supported across virtual networks that are linked to the private zone as resolution virtual networks. VM5 does belong to a resolution virtual network. Box 3: Yes VM6 belongs to registration virtual network, and an A (Host) record exists for VM9 in the DNS zone. By default, registration virtual networks also act as resolution virtual networks, in the sense that DNS resolution against the zone works from any of the virtual machines within the registration virtual network.
