To get BCS Business Analysis shows your professional expertise [BCS Foundation Certificate in Business Analysis V4.0](#) and provides validation of your NetApp knowledge and technical skills, Here, we will recommend a useful PC-BA-FBA-20 prep study material which has the function likes magic, which can relieve stress and make the PC-BA-FBA-20 exam test to be an easy thing.

Our BCS PC-BA-FBA-20 exam preparpartion materials covers these and other topics as described by BCS PC-BA-FBA-20 exam syllabus.

NEW QUESTION: 1DRAG DROPYou plan to deploy a cloud service named contosoapp. The service includes a web role named contosowebrole. The web role has an endpoint named restrictedEndpoint.You need to allow access to restricted Endpoint only from your office machine using the IP address 145.34.67.82.Which values should you use within the service configuration file? To answer, drag the appropriate value to the correct location in the service configuration file. Each value may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.**Answer:** Explanation:Explanation:* Rule with lower order are applied first.* We can selectively permit or deny network traffic (in the management portal or fromPowerShell) for a virtual machine input endpoint by creating rules that specify "permit" or"deny". By default, when an endpoint is created, all traffic is permitted to the endpoint. So for that reason, it's important to understand how to create permit/deny rules and place them in the proper order of precedence to gain granular control over the network traffic that you choose to allow to reach the virtual machine endpoint. Note that at the instant you add one or more "permit" ranges, you are denying all other ranges by default. Moving forward from the first permit range, only packets from the permitted IP range will be able to communicate with the virtual machine endpoint.

NEW QUESTION: 2Refer to the exhibit.Which two configuration changes enable the user admin to log in to the device? (Choose two.)**A.** Modify the configuration to use a named group.**B.** Configure the user admin with a password and appropriate privileges.**C.** Configure the login authentication to be case-insensitive.**D.** Configure additional login authentication under the terminal lines.**E.** Configure the login authentication to be case-sensitive.**Answer: B,C**

NEW QUESTION: 3You have a document in Microsoft OneDrive that is encrypted by using Microsoft Azure Information Protection as shown in the following exhibit.Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.NOTE: Each correct selection is worth one point.**Answer:** Explanation: ExplanationReferences: <https://docs.microsoft.com/en-us/azure/information-protection/configure-policy-protection>

NEW QUESTION: 4Which of the following is an example of audit risk?**A.** Sampling methods may not detect a material error**B.** Newer auditors may require additional supervision and training**C.**

Audit work may be lost due to a malware attack. Management may disagree with audit conclusions.
Answer: D
