Also, our HPE2-W11 practice exam has timed mock test, which enables you to manage time accordingly and it's real exam simulation helps you to pass HPE2-W11 exam on the first try.

NEW QUESTION: 1One of the DL380 Gen10 servers in your infrastructure has failed to boot after a 3rd party PCIe NIC was installed.What is the most likely cause of this issue?**A.** The manufacturer did not digitally sign the correct firmware and HPE Secure Boot halted the process.**B.** HPE does not allow 3rd party PCIe cards.**C.** The latest Support pack for ProLiant must be used before accessing any additional 3rd party products in the server.**D.** The iLO interface did not have a correct IP address provided from DHCP.**Answer: A**

NEW QUESTION: 2HOTSPOTWhere would a user click to get a Map View that will easily allow them to see the objects within HPE OneView that are associated with a specific enclosure? Exhibit:**Answer:** Explanation:

NEW QUESTION: 3A system uses an application server and database server Employing the principle of least privilege, only database administrators are given administrative privileges on the database server, and only application team members are given administrative privileges on the application server. Audit and log file reviews are performed by the business unit (a separate group from the database and application teams).The organization wants to optimize operational efficiency when application or database changes are needed, but it also wants to enforce least privilege, prevent modification of log files, and facilitate the audit and log review performed by the business unit. Which of the following approaches would BEST meet the organization's goals?**A.** Give the business unit administrative privileges on both the database and application servers so they can Independently monitor server activity.**B.** Switch administrative privileges for the database and application servers. Give the application team administrative privileges on the database servers and the database team administrative privileges on the applicationservers.**C.** Remove administrative privileges from both the database and application servers, and give the business unit "read only" privileges on the directories where the log files are kept.**D.** Restrict privileges on the log file directory to "read only" and use a service account to send a copy of these files to the business unit.**Answer: D**

NEW QUESTION: 4You are developing a ticket reservation system for an airline.The storage solution for the application must meet the following requirements:* Ensure at least 99/99%

availability and provide low latency.* Accept reservations even in network outages or other unforeseen failures* Process reservations in the exact sequence as reservation are submitted to minimize overbooking or selling the same seat to multiple travelers.* Allow simultaneous and out-of-order reservations with a maximum five-second tolerance window.You provision a resource group named airlineResourceGroup in the Azure South-Central US region.You need to provision a SQL API Cosmos DB account to support the app.How should you complete the Azure CLI commands? To answer, select the appropriate options in the answer area.NOTE: Each correct selection is worth one point.**Answer:** Explanation:Explanation:Box 1: StrongStrong consistency offers a linearizability guarantee. The reads are guaranteed to return the most recent committed version of an item. A client never sees an uncommitted or partial write. Users are always guaranteed to read the latest committed write." Process reservations in the exact sequence as reservation are submitted to minimize overbooking or selling the same seat to multiple travelers." Box 2: Enable-automatic-failover For multi-region Cosmos accounts that are configured with a single-write region, enable automatic-failover by using Azure CLI or Azure portal. After you enable automatic failover, whenever there is a regional disaster, Cosmos DB will automatically failover your account." Accept reservations even in network outages or other unforeseen failures" Box 3: southcentralus" You provision a resource group named airlineResourceGroup in the Azure South-Central US region." References: <https://docs.microsoft.com/en-us/azure/cosmos-db/consistency-levels> <https://github.com/MicrosoftDocs/azure-docs/blob/master/articles/cosmos-db/high-availability.md>
