NEW QUESTION: 1 SIMULATION You have a database that includes the following tables. All of the tables are in the Production schema. You need to create a query that returns a list of product names for all products in the Beverages category. Construct the query using the following guidelines: Use the first letter of the table name as the table alias. Use two-part column names. Do not surround object names with square brackets. Do not use implicit joins. Do not use variables. Use single quotes to surround literal values. Part of the correct Transact-SQL has been provided in the answer area below. Enter the code in the answer area that resolves the problem and meets the stated goals or requirements. You can add code within the code that has been provided as well as below it. Use the Check Syntax button to verify your work. Any syntax or spelling errors will be reported by line and character position. You may check syntax as many times as needed. **Answer:** Explanation: Please see explanation Explanation/Reference: Explanation: 1 SELECT p.productname 2 FROM Production.categories AS c 3 inner join production.products as p on c.categoryid=p.categoryid 4 WHERE c.categoryname = 'Beverages' Note: On line 3 change * to

NEW QUESTION: 2 Which three operating systems are supported by Microsoft Dynamics CRM 2015 for Outlook? Each response represents a complete solution. **A.** Windows 7 Service Pack 1 **B.** Windows 8 **C.** Windows Vista SP2 **D.** Windows Server 2012 **E.** Windows Server 2008 R2 **Answer:** **A,B,D**

NEW QUESTION: 3 You need to recommend which type of group must be used to create the planned department lists. Which type of group should you recommend? **A.** Global Security **B.** Dynamic Distribution **C.** Universal Security **D.** Universal Distribution **Answer: D**

Explanation: Topic 1, Fabrikam, Inc. Overview Fabrikam, Inc., is a pharmaceutical company located in Europe. The company has 5,000 users. The company is finalizing plans to deploy an Exchange Server 2013 organization. The company has offices in Paris and Amsterdam. Existing Environment Active Directory Environment The network contains an Active Directory domain named fabrikam.com. An Active Directory site exists for each office. Network Infrastructure The roles and location of each server are configured as shown in the following table. Client computers run either Windows 7 or Windows 8 and have Microsoft Office 2010 installed. The Paris office uses the 192.168.1.0/24 IP range. The Amsterdam office uses the 192.168.2.0/24 IP range. The offices connect to each other by using a high-speed, low-latency WAN link. Each office has a 10-Mbps connection to the Internet. Planned Exchange Infrastructure The company plans to deploy five servers that run Exchange Server. The servers will be configured as shown in the following table. The company plans to have mailbox databases replicated in database availability groups (DAGs). The mailbox databases and DAGs will be configured as shown in the following table. DAG1 will use FS1 as a file share witness. DAG2 will use FS3 as a file share witness. You plan to create the following networks on each DAG:

- * A dedicated replication network named DAGNET1
- * A MAPI network named DAGNET2

All replication traffic will run on DAGNET1. All client connections will run on DAGNET2. Client connections must never occur on DAGNET1. Replication traffic must only occur on DAGNET2 if DAGNET1 is unavailable. Each Exchange Server 2013 Mailbox server will be configured to have two network adapters. The following two mailbox databases will not be replicated as part of the DAGs:

- * A mailbox database named AccountingDB that is hosted on EX1
- * A mailbox database named TempStaffDB that is hosted on EX4

EDGE1 will have an Edge Subscription configured, with both EX1 and EX2 as targets. Requirements Planned Changes An external consultant reviews the Exchange Server 2013 deployment plan and identifies the following areas of concern:

- * The DAGs will not be monitored.
- * Multiple Edge Transport servers are required to prevent the potential for a single point of failure.

Technical Requirements Fabrikam must meet the following technical requirements:

- * Email must be evaluated for SPAM before the email enters the internal network.
- * Production system patching must minimize downtime to achieve the highest possible service to users.
- * Users must be able to use the Exchange Control Panel to autonomously join and disjoin their department's distribution lists.
- * Users must be able to access all Internet-facing Exchange Server services by using the names of mail.fabrikam.com and autodiscover.fabrikam.com.

The company establishes a partnership with another company named A: Datum Corporation. A: Datum uses the SMTP suffix adatum.com for all email addresses. Fabrikam plans to exchange sensitive information with A: Datum and requires that the email messages sent between the two companies be encrypted. The solution must use Domain Security. Users in the research and development (R&D) department must be able to view only the mailboxes of the users in their department from Microsoft Outlook. The users in all of the other departments must be prevented from viewing the mailboxes of the R&D users from Outlook. Administrators plan to produce HTML reports that contain information about recent status changes to the mailbox databases. Fabrikam is evaluating whether to abort its plan to implement an Exchange Server 2010 Edge Transport server and to implement a Client Access server in the Paris office instead. The Client Access server will have anti-spam agents installed.

NEW QUESTION: 4 管理者は、VMware vCenter Server Appliance (vCSA) に対して vCenter High Availability (vCenter HA) を有効にしたいと考えています。環境は以下で構成されています。サイト間の50msのレイテンシー vCSAの導入サイズは小さい vCenterをホストしているクラスター内の3つのホスト vCenter HAを有効にするために管理者は何をする必要がありますか? **A.** ネットワーク遅延を10ミリ秒以下に減らします。 **B.** 最小要件の4ホストに到達するには、ホストを1つ追加します。 **C.**

サイズが中以上のvCSAを展開します。D. vCenter

HAはvCSAでサポートされていないため、Windows vCenterをデプロイします。Answer: A
