NEW QUESTION: 1 Which of the following should be an information security manager's PRIMARY role when an organization initiates a data classification process? **A.** Apply security in accordance with specific classification. **B.** Define the classification structure to be implemented. **C.** Assign the asset classification level. **D.** Verify that assets have been appropriately classified.

Answer: B

NEW QUESTION: 2 What are the components required to synchronize the content between ACS On-Premise instance and ACS in the Cloud? Select One. **A.** Synchronization & Transformation Services feature. **B.** Synchronization & Authentication feature. **C.** Synchronization & Multi-tenancy feature. **D.** Audit & Synchronization feature. **Answer: D**

NEW QUESTION: 3 You have a Cisco Nexus 5500 Series switch. What is the default load-balancing hash mechanism for traffic on FCoE port channels? **A.** the source IP address and the destination IP address **B.** the source MAC address **C.** the source TCP or UDP port and the destination TCP or UDP port **D.** the source MAC address and the destination MAC address

Answer: A Explanation: On Nexus 5500 the default load balancing mechanism on the LACP port-channel for FCoE traffic is "source-destination". In this default state, all the FCoE traffic takes the same link in the port-channel when the Nexus 5500 forwards frames over FCoE VE ports. In order to enable all links to be used in the port-channel for FCoE traffic, enter the port-channel load-balance ethernet source-dest-port command to configure Nexus 5500 "port-channel load balancing" to "source-dest-port". With this configuration "source-destination-oxid" load balancing is used for FCoE traffic.
