NEW QUESTION: 1Which three considerations are accurate when adding Active Directory (AD) objects to a Workspace Environment Management (WEM) Configuration set? (Choose three.)**A.** Item Priority can be assigned to user or OU objects but NOT to machine objects.**B.** Machine objects can be added using the Add Object button or Add OU button.**C.** Multiple users can be added at the same time by separating names with semicolons.**D.** Objects must be configured in WEM before actions can be applied to them.**E.** Individual or multiple AD users can be added to the WEM console but NOT groups.**Answer: A,B,D**

NEW QUESTION: 2A customer has purchased an HP Color LaserJet Enterprise printer and wants to ensure its investment over the long term. Why should this customer buy only Original HP cartridges?**A.** Non-HP cartridges (ail prematurely 70% of the time.**B.** Low-quality non-HP cartridges require user intervention, which can lead to printer damage caused by inexperienced users.**C.** Use of non-HP color ink cartridges voids the warranty of HP Color LaserJet Enterprise printers.**D.** Service technicians are likely to make three times more service calls when non-HP cartridges are used in HP Color LaserJet Enterprise printers.**Answer: B**

NEW QUESTION: 3Which of the following is the PRIMARY safeguard for securing software and data within an information processing facility?**A.** Logical access controls**B.** Security awareness **C.** Reading the security policy**D.** Security committee**Answer: A****Explanation:** Explanation/Reference:Explanation:To retain a competitive advantage and meet basic business requirements, organizations must ensure that the integrity of the information stored on their computer systems preserve the confidentiality of sensitive data and ensure the continued availability of their information systems. To meet these goals, logical access controls must be in place. Awareness (choice A) itself does not protect against unauthorized access or disclosure of information. Knowledge of an information systems security policy (choice B), which should be known by the organization's employees, would help to protect information, but would not prevent the unauthorized access of information. A security committee (choice C) is key to the protection of information assets, but would address security issues within a broader perspective.

NEW QUESTION: 4Matt, a security administrator, wants to configure all the switches and routers in the network in order to securely monitor their status. Which of the following protocols would he need to configure on each device?**A.** IPSec**B.** SNMPC. SNMPv3**D.** SMTP**Answer: C****Explanation:**Explanation: Currently, SNMP is predominantly used for monitoring and performance management. SNMPv3 defines a secure version of SNMP and also facilitates remote configuration of the SNMP entities.
