Successful people are those who never stop advancing.

**NEW QUESTION: 1**Your client has an item that is used globally. The site in Colorado is evaluating a local source for the item. The buyer requires the incoming goods from the local source to be separated from the goods received from non local sources. Which three actions should be performed to meet this requirement? (Choose three.) **A.** Create item transaction default for the item in the Item Master Organization. **B.** Change the PO Line receipt routing to Inspection Required. **C.** Create a separate subinventory to stock goods from the local source. **D.** Ensure that you do not create an item transaction default for the Item in the Inventory Organization. **E.** Enter the item in the subinventory form. **F.** Modify organization item attributes to default a subinventory. **G.** Modify master item attributes to default a subinventory. **H.** Insert a separate subinventory on the purchase order and attach Receiver Notes. **Answer: C,D,H** Explanation: Explanation/Reference: Explanation:

**NEW QUESTION: 2**A business critical enterprise resource planning (ERP) system uses a central database at a company's primary data center. The company has built an out-of-region disaster recovery data center and intends to implement a standby ERP system with an eight hour RTO and 30 minute RPO. Which architectural approach to implement service continuity for the ERP database will meet the RTO and RPO targets? **A.** Implement synchronous database replication and configure application logic to ensure transactions are identical in both data centers as the recovery objectives do not allow for any in-flight data loss. **B.** Implement asynchronous replication of the ERP database, application, and middle tiers to ensure the ERP system is back online with less than eight hours of data loss within 30 minutes of an event. **C.** Implement asynchronous replication of the ERP database, application, and middle tiers to ensure the ERP system is back online with less than 30 minutes of data loss within eight hours of an event. **D.** Perform daily full database backups to tape and overnight ship the backup tape media from one datacenter to the other to ensure the ERP system is back online with less than eight hours of data loss within 30 minutes of an event. **Answer: C**

**NEW QUESTION: 3**At which level do you assign the print program to the correspondence type? **A.** At company code level only **B.** At client level only **C.** At system level **D.** At client or company code level **Answer: A**
