NEW QUESTION: 3Note: This question is part of a series of questions that present the same scenario.Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.After you answer a question in this sections, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.You have Microsoft SQL Server on a Microsoft Azure virtual machine that has a database named DB1.You discover that DB1 experiences WRITE_LOG waits that are longer than 50 ms.You need to reduce the WRITE_LOG wait time.Solution: Add additional log files to tempdb.Does this meet the goal?**A.**

NoB. YesAnswer: AExplanation:In SQL Server, if we have a transactional based system and find a high WRITELOG wait type this is a performance bottleneck and can cause the transaction log file to grow rapidly and frequently.It is being recommended to SQL server users that they must archive the log files on a separate disk for getting better performance.References:
