NEW QUESTION: 1 Which two features improve BGP convergence? (Choose two.)
A. advertise map
B. communities
C. additional paths
D. next-hop address tracking
E. soft reconfiguration

Answer: C, D
Explanation: The BGP Support for Next-Hop Address Tracking feature is enabled by default when a supporting Cisco software image is installed. BGP next-hop address tracking is event driven. BGP prefixes are automatically tracked as peering sessions are established. Next-hop changes are rapidly reported to the BGP routing process as they are updated in the RIB. This optimization improves overall BGP convergence by reducing the response time to next-hop changes for routes installed in the RIB. When a best path calculation is run in between BGP scanner cycles, only next-hop changes are tracked and processed. BGP routers and route reflectors (RRs) propagate only their best path over their sessions. The advertisement of a prefix replaces the previous announcement of that prefix (this behavior is known as an implicit withdraw). The implicit withdraw can achieve better scaling, but at the cost of path diversity. Path hiding can prevent efficient use of BGP multipath, prevent hitless planned maintenance, and can lead to MED oscillations and suboptimal hot-potato routing. Upon nexthop failures, path hiding also inhibits fast and local recovery because the network has to wait for BGP control plane convergence to restore traffic. The BGP Additional Paths feature provides a generic way of offering path diversity; the Best External or Best Internal features offer path diversity only in limited scenarios. The BGP Additional Paths feature provides a way for multiple paths for the same prefix to be advertised without the new paths implicitly replacing the previous paths. Thus, path diversity is achieved instead of path hiding. References:

D. AWSはユーザーへの請求アラートの送信を停止します。**Answer: B**
Explanation:

AWSの見積もり使用料金に関するアラームを作成するには、ユーザーはAWSの見積もり料金の監視を有効にする必要があります。これにより、課金アラームの作成に使用されるメトリックデータを作成できます。推定料金の監視が有効になると、ユーザーはそれを無効にすることはできません。

ユーザは、請求に関する通知を受け取らないようにするためにアラームを削除する必要があります。
