People Trust Us, HP HP Certification updates New HP2-I67 Exam Dumps itself consistently, so professionals also need to adapt themselves accordingly.

NEW QUESTION: 1What are the roles an organization can play from privacy perspective?
i. Data Controller - determines the means and purpose of processing of data which is collected from its end customers
ii. Data Controller - determines the means and purpose of processing of data which is collected from its employees
iii. Data Sub-Processor - processes personal data on behalf of data processor
iv. Joint Controller - determines the means and purpose of data processing along with other data controller
Please select correct option:
A. ii, iii and iv
B. i, ii and iii
C. i, iii and iv
D. i, ii, iii and iv
Answer: B

NEW QUESTION: 2**A.** Option A
B. Option D
C. Option C
D. Option B
Answer: C
Explanation:
Explanation You can use the container_commands key to execute commands that affect your application source code. Container commands run after the application and web server have been set up and the application version archive has been extracted, but before the application version is deployed. Non-container commands and other customization operations are performed prior to the application source code being extracted. You can use leader_only to only run the command on a single instance, or configure a test to only run the command when a test command evaluates to true. Leader-only container commands are only executed during environment creation and deployments, while other commands and server customization operations are performed every time an instance is provisioned or updated. Leader-only container commands are not executed due to launch configuration changes, such as a change in the AMI Id or instance type. For more information on customizing containers, please visit the below URL:
<http://docs.aws.amazon.com/elasticbeanstalk/latest/dg/customize-containers-ec2.html>

NEW QUESTION: 3Azure Logicアプリのエラーメッセージを修正する必要があります。どの構成値を使用する必要がありますか？回答するには、回答領域で適切なオプションを選択します。注：正しい選択はそれぞれ1ポイントの価値があります。
Answer: Explanation: Explanation Scenario: You test the Logic app in a development environment. The following error message displays: '400 Bad Request' Troubleshooting of the error shows an HttpTrigger action to call the RequestUserApproval function. Note: If the inbound call's request body doesn't match your schema, the trigger returns an HTTP 400 Bad Request error.
Box 1: function If you have an Azure

function where you want to use the system-assigned identity, first enable authentication for Azure functions. Box 2: system-assigned Your logic app or individual connections can use either the system-assigned identity or a single user-assigned identity, which you can share across a group of logic apps, but not both. Reference: <https://docs.microsoft.com/en-us/azure/logic-apps/create-managed-service-identity>
