Actually, one of the most obvious advantages of our CIS-SP simulating questions is their profession, which is realized by the help from our experts.

NEW QUESTION: 1 You are evaluating the implementation of an Edge Server. You need to identify which ports that must be open on the firewall to support the planned federation relationship.Which port should you open between the Internet and the planned Edge Server? To answer, configure the appropriate protocol and port in the answer area.Hot Area:**Answer:** Explanation:Explanation:http://technet.microsoft.com/en-us/library/jj204756.aspxPlanned federation relationship in the case study - Partner company uses XMPP for IM - Answer is to use port TCP/5269 which is for XMPP federation

NEW QUESTION: 2 You wanted to destroy some of the dependent resources from real infrastructure. You choose to delete those resources from your configuration file and run terraform plan and then apply. Which of the following way your resources would be destroyed?
A. Those would be destroyed in the order in which they were written in the configuration file previously before you have deleted them from configuration file.**B.** Terraform can still determine the correct order for destruction from the state even when you delete one or more items from the configuration.**C.** You can not destroy resources by deleting them from configuration file and running plan and apply.**D.** The resource will be destructed in random order as you have already deleted them from configuration.**Answer: B**Explanation:Terraform typically uses the configuration to determine dependency order. However, when you delete a resource from a Terraform configuration, Terraform must know how to delete that resource. Terraform can see that a mapping exists for a resource not in your configuration and plan to destroy. However, since the configuration no longer exists, the order cannot be determined from the configuration alone.To ensure correct operation, Terraform retains a copy of the most recent set of dependencies within the state. Now Terraform can still determine the correct order for destruction from the state when you delete one or more items from the configuration.

NEW QUESTION: 3 Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some questions sets might have more than one correct solution, while others might not have a correct solution.After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.You have an on-premises Active Directory domain named contoso.com.You install and run Azure AD Connect on a server named Server1 that runs Windows Server.You need to view Azure AD Connect events.You use the System event log on Server1.Does that meet the goal?**A.** No**B.** Yes

Answer: A Explanation:ExplanationReferences:
