Boltポリシーを変更し、開発ツールが使用するライセンスのアクションを再割り当てに設定します。**D.** node\_modulesディレクトリのみをスキャンするようにWhiteSource Boltを構成します。

**Answer: A,B** Explanation: A: To resolve NPM dependencies, you should first run "npm install" command on the relevant folders before executing the plugin. C: All npm packages contain a

file, usually in the project root, called package.json - this file holds various metadata relevant to the project. This file is used to give information to npm that allows it to identify the project as well as handle the project's dependencies. It can also contain other metadata such as a project description, the version of the project in a particular distribution, license information, even configuration data - all of which can be vital to both npm and to the end users of the package.
