Photoexperienceacademy- Why Our IT Experts At Number #1 For Customer' s Choice: 100% Real VCS-285 Veritas Exam Training Questions pdf.

NEW QUESTION: 1조직의 데이터 정책은 다음을 기반으로 하는 데이터 보존 기간을 포함해야 합니다.**A.** 규정 준수.**B.** 사업 절차.**C.** 응용 프로그램 해고.**D.** 디지털 인증서 만료**Answer: A**

NEW QUESTION: 2A. Options snapmirror.resync on**B.** Options snapmirror.access on**C.**

Snapmirror initialize**D.** Snap mirror resync**Answer: C,D**Explanation:

https://library.netapp.com/ecmdocs/ECMP1196979/html/man1/na_snapmirror.1.html

snapmirror initialize [-S source] [-k kilobytes] [-s src_snap] [-c create_dest_snap] [-w destination] Starts an initial transfer over the network. An initial transfer is required before update transfers can take place. The initialize command must be issued on the destination node. If the destination is a volume, it must be restricted (see na_vol(1) for information on how to examine and restrict volumes). If the destination is a qtree, it must not already exist (see na_qtree(1) for information on how to list qtrees). If a qtree already exists, it must be renamed or removed (using an NFS or CIFS client), or snapmirror initialize to that qtree will not work. snapmirror resync [-n] [-f] [-S source] [-k kilobytes] [-s src_snap] [-c create_dest_snap] [-w destination] Resynchronizes a broken-off destination to its former source, putting the destination in the snapmirrored state and making it ready for update transfers. The resync command must be issued on the destination node.

NEW QUESTION: 3Your company identifies the following business continuity and disaster recovery objectives for virtual machines that host sales, finance, and reporting application in the company's on-premises data center.*The finance application requires that data be retained for seven years. In the event of a disaster, the application must be able to run from Azure. The recovery in objective (RTO) is 10 minutes,* The reporting application must be able to recover point in-time data at a daily granularity. The RTO is eight hours.*The sales application must be able to fail over to second on-premises data center.You need to recommend which Azure services meet the business continuity and disaster recovery objectives.The solution must minimize costs.What should you recommend for each application? To answer, drag the appropriate services to the correct application. Each service may be used once or more than once. You may need to drag the spin bar between panes or scroll to view content.**Answer:** Explanation:Explanation
