NEW QUESTION: 1You have an Azure Active Directory (Azure AD) tenant named contoso.com. The tenant contains the users shown in the following table. The tenant contains computers that run Windows 10. The computers are configured as shown in the following table. You enable Enterprise State Roaming in contoso.com for Group1 and GroupA. For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point. **Answer:** Explanation: Explanation Enterprise State Roaming provides users with a unified experience across their Windows devices and reduces the time needed for configuring a new device. Box 1: Yes Box 2: No Box 3: Yes References: <https://docs.microsoft.com/en-us/azure/active-directory/devices/enterprise-state-roaming-overview>

NEW QUESTION: 2 Choose: **A.** Financial reports **B.** Vendor's list **C.** Logistics work **D.** Track **E.** Records **Answer: D, E**

NEW QUESTION: 3 Which of the following Print Production tools helps in providing control over inks at output time and is especially useful for print service providers? **A.** Add Printer Marks **B.** Output Preview **C.** Acrobat Distiller **D.** Ink Manager **Answer: D** Explanation: The Ink Manager helps in providing control over inks at output time and is especially useful for print service providers. For instance, if a process job contains a spot color, a service provider can open the document and change the spot color to the equivalent CMYK process color. If a document includes two similar spot colors when only one is needed, or if the same spot color has two different names, a service provider can map the two to a single alias. In a trapping workflow, the Ink Manager allows a user to set the ink density for controlling when trapping takes place, and to set the correct number and sequence of inks. Answer option B is incorrect. Output Preview is one of the Print Production tools. It combines separation preview, soft proofing, color warnings, and more in one convenient dialog box. The Output Preview dialog box is used to simulate how user's PDF looks in different conditions. The top part of the dialog box has multiple controls for previewing document. The Preview menu permits users to switch between previewing separations and previewing color warnings. Output Preview also contains access to the complete Ink Manager in order to remap spot-color inks in both printing and previewing. Ink mapping for previewing is only applied when the Output Preview dialog box is open. Answer option D is incorrect. This tool converts PostScript files to PDF. Answer option C is incorrect. This tool adds standard printer marks to a PDF page for positioning.

NEW QUESTION: 4 **Answer:** Explanation: Explanation Transport Control Protocol (TCP), User Datagram Protocol (UDP) ports, and Protocol Numbers are important to TCP/IP networking, intranets, and the Internet. Ports and protocol numbers provide access to a host computer. However, they also create a security hazard by allowing uninvited access. Therefore, knowing

which port to allow or disable increases a network's security. If the wrong ports or protocol numbers are disabled on a firewall, router, or proxy server as a security measure, essential services might become unavailable. TCP port 25 is used for simple mail transfer protocol which is used to e-mail routing between mail servers. TCP port 443 is used for Audio, video and application sharing sessions as well as data sharing sessions. RTP/UDP port 50020-50039 must be used for outbound video sessions. RTP/UDP port 50000-50019 must be used for outbound audio sessions.
