Sie erwerben ein Microsoft Azure-Abonnement und erstellen drei Microsoft Operations Management Suite-Arbeitsbereiche (OMS) mit den Namen Workspace1, Workspace2 und Workspace3. Sie müssen Microsoft Monitoring Agent auf den Servern bereitstellen, um die folgenden Anforderungen zu erfüllen: - Antimalwaredaten von allen Servern müssen in Workspace1 sichtbar sein. - Sicherheits- und Überwachungsdaten von den Domänencontrollern und den Virtualisierungshosts müssen in Workspace2 sichtbar sein. - Systemaktualisierungsdaten von allen Servern in allen Arbeitsgruppen müssen in Workspace sichtbar sein. Wie viele OMS-Agenten sollten Sie bereitstellen? **A. 0 B. 1 C. 2 D. 3**

**NEW QUESTION: 2** To complete the sentence, select the appropriate option in the answer area.  
**Answer:** Explanation: Explanation Azure Custom Vision is a cognitive service that lets you build, deploy, and improve your own image classifiers. An image classifier is an AI service that applies labels (which represent classes) to images, according to their visual characteristics. Unlike the Computer Vision service, Custom Vision allows you to specify the labels to apply. Note: The Custom Vision service uses a machine learning algorithm to apply labels to images. You, the developer, must submit groups of images that feature and lack the characteristics in question. You label the images yourself at the time of submission. Then the algorithm trains to this data and calculates its own accuracy by testing itself on those same images. Once the algorithm is trained, you can test, retrain, and eventually use it to classify new images according to the needs of your app. You can also export the model itself for offline use.
