Financial and Project Plan Setup Options  
The following table describes the basic budget, forecast, or project plan setup options that determine how a plan type is used in the context of a project. Except for third-party scheduling, you can't edit these options at the project level.

Option	Location	Description
Planning amounts	Financial plan type	Indicates that the financial plan type supports the creation of versions with the following amounts: * Cost amounts * Revenue amounts * Both cost and revenue amounts * Either cost or revenue amounts
Approved budget or primary forecast	Financial plan type	Determines whether a financial plan type is used for creating approved budget versions or primary forecast versions that are used for plan comparison or project performance reporting.
Default financial plan type	Financial plan type	Determines whether the financial plan type is the default selection when you create budget or forecast versions.
Workflows	Financial plan type	Enables the use of a workflow for managing budget or forecast status changes.
Third-party scheduling software	Project plan type	Indicates whether project planning is performed in Microsoft Project. If third-party scheduling is disabled in the project plan type, you can use the associated project or project template to create a project in Microsoft Project. However, you can't export the new project or link it to one created in Oracle Fusion Project Portfolio Management.
Multiple transaction currencies		

Financial and project plan type Enables entry of plan amounts in currencies other than the project currency. Budgetary control settings Financial plan type Manages options for creating control budgets in Oracle Fusion Budgetary Control.
