versions constantly, Read below to discover why examkiller is your premier source for HP2-I63 practice tests, and true testing environment.

We don't just want to make profitable deals, but also to help our users pass the exams with the least amount of time to get HP2-I63 certificate, Good choice may do more with less.

In the end please trust us we are the best actual test dumps provides not only the Photoexperienceacademy HP2-I63 dumps content material but also our service, Candidates can avail the opportunity of demo of free HP2-I63 dumps.

In addition, we have never been complained by our customers about this problem, **HP2-I63 Latest Exam Review** If you have any questions on our exam dumps, please to ask, Turn pressure into power, which may be your chance to complete the transformation.

NEW QUESTION: 1 Which of the following type of a computer network are variation of LAN and are dedicated to connecting storage devices to servers and other computing devices? **A. LAN B. PAN C. MAN D. SAN**
Answer: D
Explanation: Explanation/Reference: A storage area network (SAN) is a dedicated network that provides access to consolidated, block level data storage. SANs are primarily used to enhance storage devices, such as disk arrays, tape libraries, and optical jukeboxes, accessible to servers so that the devices appear like locally attached devices to the operating system. A SAN typically has its own network of storage devices that are generally not accessible through the local area network (LAN) by other devices. For your exam you should know below information about computer networks:
Local Area Network (LAN) A local area network (LAN) is a computer network that interconnects computers within a limited area such as a home, school, computer laboratory, or office building using network media.
Local Area Network Click [HERE](#) for original source of image
Wide Area Network A wide area network (WAN) is a network that covers a broad area (i.e., any telecommunications network that links across metropolitan, regional, national or international boundaries) using leased telecommunication lines.
Wide Area Network Source of image: <http://www.netprivateer.com/images/lanwan.gif>
Metropolitan Area Network A metropolitan area network (MAN) is a computer network in which two or more computers or communicating devices or networks which are geographically separated but in same metropolitan city and are connected to each other are said to be connected on MAN. Metropolitan limits are determined by local municipal corporations; the larger the city, the bigger the MAN, the smaller a metro city, smaller the MAN

Personal Area Network A personal area network (PAN) is a computer network used for data transmission among devices such as computers, telephones and personal digital assistants. PANs can be used for communication among the personal devices themselves (intrapersonal communication), or for connecting to a higher level network and the Internet (an uplink).
