NEW QUESTION: 4Your company has an Active Directory domain. The company runs Remote Desktop Services. You configure the main office printer as the default printer on the Remote Desktop Session Host Server. The company policy states that all remote client computers must meet the following requirements:You need to create a Group Policy object (GPO) by using the Remote Desktop Session Host Printer Redirection template to meet the company policy.What should you do?**A.** Set the Use Remote Desktop Easy Print printer driver first option to Disabled. Apply the GPO to the Remote Desktop Session Host Server.**B.** Set the Use Remote Desktop Easy Print printer driver first option to Disabled. Apply the GPO to all the client computers.**C.** Set the Do not set default client printer to be default printer in a session option to Enabled. Apply the

GPO to the Remote Desktop Session Host Server. **D.** Set the Do not set default client printer to be default printer in a session option to Enabled. Apply the GPO to all the client computers. **Answer: C** Explanation: Do not set default client printer to be default printer in a session This policy setting allows you to specify whether the client default printer is automatically set as the default printer in a Terminal Services session. By default, Terminal Services automatically designates the client default printer as the default printer in a Terminal Services session. You can use this policy setting to override this behavior. If you enable this policy setting, the default printer is the printer specified on the remote computer. If you disable this policy setting, the terminal server automatically maps the client default printer and sets it as the default printer upon connection. If you do not configure this policy setting, the default printer is not specified at the Group Policy level. However, an administrator can configure the default printer for client sessions by using the Terminal Services Configuration tool.
