NEW QUESTION: 1 Pin, Password, Passphrases, Tokens, smart cards, and biometric devices are all items that can be used for Authentication. When one of these item listed above in conjunction with a second factor to validate authentication, it provides robust authentication of the individual by practicing which of the following?**A.** Multi-party authentication**B.** Mandatory authentication**C.** Discretionary authentication**D.** Two-factor authentication**Answer: D**Explanation:Once an identity is established it must be authenticated. There exist numerous technologies and implementation of authentication methods however they almost all fall underthree major areas.There are three fundamental types of authentication:Authentication by knowledge-something a person knowsAuthentication by possession-something a person has Authentication by characteristic-something a person isLogical controls related to these types are called "factors."Something you know can be a password or PIN, something you have can be a token fob or smartcard, and something you are is usually some form of biometrics. Single-factor authentication is the employment of one of these factors, two-factor authentication isusing two of the three factors, and three-factor authentication is the combination of all threefactors.The general term for the use of more than one factor during authentication is multifactorauthentication or strong authentication.Reference(s) used for this question:Hernandez CISSP, Steven (2012-12-21). Official (ISC)2 Guide to the CISSP CBK, Third Edition((ISC)2 Press) (Kindle Locations 2367-2379). Auerbach Publications. Kindle Edition.

NEW QUESTION: 2 As a candidate for CCBA, you should be able to recognize the activities associated with each knowledge area.Which of the following are business analysis planning and monitoring activities? Each correct answer represents a complete solution.**A.** Identifying stakeholders**B.** Planning how requirements will be approached, traced, and prioritized**C.** Job shadowing**D.** Defining and determining business analysis processes**Answer: A,B,D**Explanation: ExplanationThe most common business analysis planning and monitoring activities are. identifying stakeholders, defining roles and responsibilities of stakeholders in the business analysis effort, developing estimates for business analysis tasks, planning how the business analyst will communicate with stakeholders, planning how requirements will be approached, traced, and prioritized, determining the deliverables that the business analyst will produce, defining and determining business analysis processes, and determining the metrics that will be used for monitoring business analysis work.Answer A is incorrect. Job shadowing is an elicitation process that is a part of job observation. In this process,the observer is required to keep an eye on those workers whose work routine is down and who are unable to explain their work. The observer has to understand their work process for better assessment of the modifications of the work required. The following are the approaches for this technique: Passive/Invisible. In this approach, the observer does not ask questions from the user about his work while the user is working.Active/Visible. In this approach, the observer does ask questions from the user about his work even when the user is working.

NEW QUESTION: 3A VIA client tries to initially connect to corporate office controller through an intermediate firewall. However,the VPN connection fails. The administrator examines the firewall rules and determines that rules for UDP4500 and UDP 500 are configured.Which additional protocol must be allowed in the firewall rules to resolve this connection failure?**A.** ESP**B.** TCP 443**C.** TCP 22**D.** UDP 8200**Answer: A**

NEW QUESTION: 4 Sie haben ein Microsoft 365-Abonnement.Sie erstellen eine Warnungsrichtlinie, wie in der folgenden Abbildung gezeigt.Verwenden Sie die Dropdown-Menüs, um die Antwortauswahl auszuwählen, mit der die einzelnen Anweisungen auf der Grundlage der Informationen in der Grafik abgeschlossen werden.HINWEIS: Jede richtige Auswahl ist einen Punkt wert.**Answer:** Explanation:ExplanationThe 'Activity is' setting is configured as 'Detected malware in file'. This setting means the policy is applied to files stored in SharePoint or OneDrive.The Aggregation settings has a 120 minute window. This means that if there 20 detections in 120 minutes, an email will be generated. Therefore, the maximum number of emails generated in 24 hours is 12.Reference: https://docs.microsoft.com/en-us/microsoft-365/compliance/alert-policies
