NEW QUESTION: 1 You work as an IT professional in an international company which is named Contoso. Your major job is to translate business goals into technology decisions and plan mid-range to long-term strategies. And you are experienced in network infrastructure, security policy and business continuity. In your company, you are responsible for infrastructure design and global configuration changes. There is one Active Directory domain and three Network Information Services (NIS) domains in your network. Windows Server 2008 is run by all domain controllers. All NIS domain servers run UNIX-based operating systems. Since you are the technical support, the company CIO assigns a task to you. You are asked to plan the integration of the Active Directory domain and the NIS domains.Your solution must meet the following requirements:Cut down the costs required to implement the solution to the least.Cut down the number of additional Windows servers required.Provide centralized administration of Active Directory domain objects and NISdomain objects.What should be included in your plan?**A.** The Server for Network Information Services role service should be added.**B.** A Microsoft Identity Lifecycle Manager (ILM) 2007 server should be implemented.---**C.** Install Active Directory Federation Services (AD FS) should be installed.**D.** The subsystem for UNIX-based applications should be installed.**Answer: A**Explanation:Explanation/Reference: Services for UNIX implements Server for Network Information Service (NIS), which provides NIS server functionality based on Windows 2000 Active Directory. Server for NIS installed on a Windows 2000 Server domain controller can be used as a master NIS server to administer a UNIX NIS domain. Server for NIS implements NIS 2.0 protocol. It supports both UNIX-based NIS subordinate (slave) servers as well UNIX-based NIS clients.
