Our company is a multinational company with sales and after-sale service of CIPP-US exam torrent compiling departments throughout the world, The most key consideration is the quality of CIPP-US actual test.

Targeted and Efficient CIPP-US valid study material .

NEW QUESTION: 1 Sie müssen einen benutzerdefinierten Domänennamen für Azure AD definieren, um die geplante Infrastruktur zu unterstützen. Welchen Domainnamen sollten Sie verwenden? **A.** humongousinsurance.onmicrosoft.com **B.** humongousinsurance.com **C.** humongousinsurance.local **D.** ad.humongousinsurance.com **Answer: B**
Explanation: Every Azure AD directory comes with an initial domain name in the form of domainname.onmicrosoft.com. The initial domain name cannot be changed or deleted, but you can add your corporate domain name to Azure AD as well. For example, your organization probably has other domain names used to do business and users who sign in using your corporate domain name. Adding custom domain names to Azure AD allows you to assign user names in the directory that are familiar to your users, such as ''. instead of 'alice@domainname.onmicrosoft.com'.
Scenario: Network Infrastructure: Each office has a local data center that contains all the servers for that office. Each office has a dedicated connection to the Internet. Humongous Insurance has a single-domain Active Directory forest named humongousinsurance.com
Planned Azure AD Infrastructure: The on-premises Active Directory domain will be synchronized to Azure AD.
