NEW QUESTION: 1 Nach einer Planungssitzung wurde ein neues Projekt gestartet. Das Projekt steht unter direkter Aufsicht einer Führungskraft in der Organisation. Nach einem Besprechungstreffen hört der Projektmanager, wie eine Führungskraft von einem der Teammitglieder ein Dashboard anfordert, um den Gesamtprojektstatus anzuzeigen. Was soll der Projektmanager tun?
A. Aktualisieren Sie den Kommunikationsverwaltungsplan, um informelle Anforderungen einzuschließen
B. Aktualisieren Sie die Bewertungsmatrix für das Stakeholder-Engagement
C. Bitten Sie das Teammitglied, die Anforderung über den Projektmanager weiterzuleiten
D. Bitten Sie das Teammitglied, ein Dashboard zu entwickeln, um die Anforderung zu erfüllen.
Answer: C

NEW QUESTION: 2 Which three activities can be performed with the Oracle Enterprise manager Groups functionality?
A. Monitor outstanding alerts and policy violations as a group.
B. Perform administrative tasks on a group.
C. Perform administration on a user group.
D. Monitor the overall performance of a group and view the performance summary of targets within the group.
E. Monitor a group of LUNs used by a database for storage.
Answer: B,C,D
Explanation/Reference: C: An Administration Group is a special type of group designed to automatically deploy management settings (monitoring templates, compliance standards, cloud policies) to targets when they join the group. Administration Groups are created by defining their membership criteria based on target properties. Note: * The group home page continues to provide an overview of the status and health of members of the group and a central way to launch operations on the groups, such as submit jobs, start blackouts, and so forth.

Server1 runs Mailbox Server Role and Client Access Server Role. You are configuring Anti-Spam Filtering on Server1. You need to ensure that all emails with the words "Free Credit Check" are rejected unless the email is sent to Finance Distribution Group. You also need to ensure that all emails from partner company Domain name adatum.com bypass the Anti-Spam Filter. You run the Add-ContentFilterPhrase and add the words "Free Credit Check" What should you do next?
A. Run the Set-SenderFilterConfig and Set-RecipientFilterConfig
B. Run the Set-SenderReputationConfig and Set-TransportConfig
C. Run the Set-ContentFilterConfig and

Set-RecipientFilterConfigD. Run the Set-TransportConfig and Set-ContentFilterConfigAnswer:
C

NEW QUESTION: 4You need to recommend a solution for the sales reports.What should you include in the recommendation?**A.** BranchCache in distributed cache mode**B.** BranchCache in hosted cache mode**C.** Distributed File System (DFS)**D.** Offline files**Answer: C****Explanation:**DFS to increase the availability of data by storing the data on multiple servers. DFS could make the sales reports available, even if the WAN link is down.* Scenario: Server3 has a shared folder that contains sales reports. The sales reports are read frequently by the users in both offices. The reports are generated automatically once per week by an enterprise resource planning (ERP) system. If a WAN link fails, users must be able to access ALL of the sales reports**Incorrect:**Not A, Not C: Branchcache (hosted or distributed) does not work when content server is not reachable (link down).Not B: According to the scenario, the computers in the San Diego office are often replaced,so offline caching will not make the reports available all the time if WAN link goes down.**Reference:** What Is DFS?

Its main office is in Vancouver.Alpine Ski House also has branch offices in Montreal, Denver, and New York.An additional sales office is located in Los Angeles. This office has client devices only.All servers in each office run Windows Server 2012 R2. All client devices in each office run Windows 8.1.Alpine Ski House plans to acquire another company named Margie's Travel. Margie's Travel has an AD DS domain named margiestravel.com.Danner and New YorkThe Denver and New York offices have their own child domain named us.alpineskihouse.com. The domain controllers are displayed in the following table:

Office	Domain Controller
Vancouver	apl-skihouse-01
Montreal	apl-skihouse-02

Alpine Ski House has an Active Directory Domain Services (AD DS) domain named aplineskihouse.com for the Vancouver and Montreal offices. The forest and domain functional levels are set to Windows Server 2008. The domain controllers in the domain contain Dynamic Host Configuration Protocol (DHCP) servers and DNS servers. The domain controllers are displayed in the following table:

Office	Server
Vancouver	ALP-CA01

The Vancouver office also has a certification authority (CA) installed on a server named ALP-CA01.**Business Requirements**GrowthAn additional branch office is planned in an extremely remote, mountainous location that does not have traditional access to the Internet.The remote branch office location will use a high-latency, low-bandwidth satellite connection to the Denver and Vancouver offices.The Los Angeles office will be expanded to include sales and billing staff. The Los Angeles location will not contain IT staff.**File Management**Currently, each office has a dedicated file share that is hosted on a domain controller. The company plans to implement a new file sharing capability to synchronize data between offices and to maximize performance for locating files that are saved in a different branch office. Sales users in the Los Angeles office must also be able to retrieve file data from each branch office.**Recovery time objective**The business requires that the data stored in AD DS must be recovered within an hour. This data includes user accounts, computer accounts, groups, and other objects. Any customized attributes must also be recovered. The current backup solution uses a tape drive, which requires a minimum of two hours between notification and recovery.**Office 365**Alpine Ski House purchased Office 365 Enterprise E3 licenses for all users in the organization.**Technical Requirements**Existing environmentUsers in the Montreal office of Alpine Ski House report slow times to log on to their devices. An administrator determines that users in the Montreal location occasionally authenticate to a domain controller with an IP address of 172.16.0.10/24. All authentication requests must first be attempted in the same location as the client device that is being authenticated.**Growth**The remote branch office must have a single domain controller named REMOTE-DC01.us.alpineskihouse.com.The replication between domains must either use best-effort or low-cost replication. After the expansion, authentication must occur locally.Any server placed in the Los Angeles office must not contain cached passwords.**File management**Where possible, the new file management solution must be centralized. If supported, the data must be stored in a single location in each branch office.**Acquisition**After

acquiring Margie's Travel, all AD DS objects, including user account passwords, must be a migrated to the alpiniskihouse.com domain. Alpine Ski House plans to use the Active Directory Migration Tool (ADMT) to complete the migration process. The password complexity requirements for the margiestravel.com domain are unknown. Users should not be forced to change their passwords after migrating their user accounts. Some computer objects will be renamed during the migration. Office 365 Alpine Ski House must use Microsoft Azure to facilitate directory synchronization (DirSync) with Office 365. The DirSync utility must be installed on a virtual machine in Microsoft Azure.
