How can the user create the second subnet? **A. It is not possible to create a second subnet as one subnet with the same CIDR as the VPC has been created B. There is no need to update the subnet as VPC automatically adjusts the CIDR of the first subnet based on the second subnet's CIDR C. The user can modify the first subnet CIDR with AWS CLI D. The user can modify the first subnet CIDR from the console** **Answer: C** **Explanation:** Explanation A Virtual Private Cloud (VPC) is a virtual network dedicated to the user's AWS account. A user can create a subnet with VPC and launch instances inside the subnet. The user can create a subnet with the same size of VPC. However, he cannot create any other subnet since the CIDR of the second subnet will conflict with the first subnet. The user cannot modify the CIDR of a subnet once it is created.
