The evaluation logic follows these rules: By default, all requests are denied. (In general, requests made using the account credentials for re- sources in the account are always allowed.) An explicit allow policy overrides this default.An explicit deny policy overrides any allows.In this case since there is an explicit deny policy, it will over ride everything and the request will be denied.Reference: http://docs.aws.amazon.com/IAM/latest/UserGuide/AccessPolicyLanguage_EvaluationLogic.html
