NEW QUESTION: 1What is the MOST critical piece to disaster recovery and continuity planning?
A. Availability of backup information processing facilities**B.** Management support**C.** Staff training**D.** Security policy
Answer: B
Explanation:The keyword is ' MOST CRITICAL ' and the correct answer is ' ManagementSupport ' as the management must be convinced of its necessity and that's why a business casemust be made. The decision of how a company should recover from any disaster is purely abusiness decision and should be treated as so.The other answers are incorrect because :Security policy is incorrect as it is not the MOST CRITICAL piece. Availability of backup information processing facilities is incorrect as this comes once the organization has BCP Plans in place and for a BCP Plan , management support must be there. Staff training comes after the plans are in place with the support from management.Reference : Shon Harris , AIO v3 , Chapter-9: Business Continuity Planning , Page : 697.

NEW QUESTION: 2HOTSPOTA company uses SharePoint for document sharing and collaboration. Users create content types for different types of documents that are created daily. All document content types have ProjectID, Type, and AuditStatus columns. ProductID is not a required field. The Auditing department requires that every document have a ProjectID within two weeks of the creation date.If a document does not have a ProjectID, the AuditStatus column must show a message for users to specify the ProjectID. For performance reasons, fewer than 50 documents at a time should be processed.You need to write a work-item timer job to meet the requirement.How should you complete the relevant code?
