NEW QUESTION: 1A. Option BB. Option DC. Option AD. Option EE. Option C**Answer: B,C,D**

NEW QUESTION: 2When performing an installation you notice DHCP has set your Management Server subnet mask to255.255.255.252. Based on EMC best practices, what is the appropriate subnet mask value for Management Server network 128.221.252.0?A. 255.255.255.224B. 255.255.255.248C. 255.255.255.128D. 255.255.255.192**Answer: A**

NEW QUESTION: 3Several accounting department users are reporting unusual Internet traffic in the browsing history of their workstations after returning to work and logging in. The building security team informs the IT security team that the cleaning staff was caught using the systems after the accounting department users left for the day.Which of the following steps should the IT security team take to help prevent this from happening again?(Choose two.)A. Configure mandatory access controls to allow only accounting department users to access the workstations.B. Configure a policy for workstation account timeout at three minutes.C. Set up a camera to monitor the workstations for unauthorized use.D. Configure NAC to set time-based restrictions on the accounting group to normal business hours.E. Install a web monitor application to track Internet usage after hours.**Answer: B,D**

NEW QUESTION: 4Scenario:CGE decided to virtualize its infrastructure workloads and provide a virtual solution to all end users. The infrastructure workloads include Delivery Controllers, StoreFront servers, License Servers, and Microsoft SQL Servers for databases.Why is creating a resource pool comprising a maximum of 24 XenServer hosts, using a storage repository for virtual disks to provide XenMotion and high availability, and performing daily backups of the

infrastructure workloads the best design solution?**A.** It ensures the logical separation of infrastructure and virtual desktop workloads, and facilitates easier management and expansion capabilities.**B.** It provides workload flexibility to more efficiently leverage available resources within a resource pool, and facilitates expansion options. In addition, daily backups create minimal downtime for critical workloads.**C.** It ensures the logical separation of all workloads and virtual desktops. In addition, the backup solution reduces the risk of data loss and minimizes downtime.**D.** It separates infrastructure and virtual desktop workloads according to resource usage characteristics to avoid conflicts. In addition, it provides critical database services with sufficient workload-specific resources and failover capabilities.**Answer: A**
