**NEW QUESTION: 1**Where should you place the file that you want to import when configuring the Connect job that imports profile list data that must be merged into Responsys?**A.** The file to be imported should be on the SFTP server dedicated for Responsys.**B.** The file to be imported should be located in the Connect data warehouse in Responsys.**C.** The file to be imported should be located on any cloud server.**D.** The file to be imported should be located on your hard drive.**Answer: B**

**NEW QUESTION: 2****HOTSPOT**You have an Azure App Service Web App that include Azure Blob storage and an Azure SQL Database instance. The Application is instrumented by using the Application Insights SDK.You need to design a monitoring solution for the web app.Which Azure monitoring services should you use?**Answer:** Explanation:Explanation:Box 1: Azure Log AnalyticsLog Analytics plays a central role in Azure management by collecting telemetry and other data from a variety of sources and providing a query language and analytics engine that gives you insights into the operation of your applications and resources.Box 2: Azure Service MapService Map automatically discovers application components on Windows and Linux systems and maps the communication between services. With Service Map, you can view your servers in the way that you think of them: as interconnected systems that deliver critical services. Service Map shows connections between servers, processes, and ports across any TCP-connected architecture, with no configuration required other than the installation of an agent.Box 3:Azure Application InsightsView request and exception summaries in the codeIn the Code Lens line above each handler method, you see a count of the requests and exceptions logged by Application Insights in the past 24 h.Box 4: Azure Activity LogThe Azure Activity Log is a subscription log that provides insight into subscription-level events that have occurred in Azure. This includes a range of data, from Azure Resource Manager operational data to updates on Service Health events. The Activity Log was previously known as "Audit Logs" or "Operational Logs," since the Administrative category reports control-plane events for your subscriptions. Using the Activity Log, you can determine the 'what, who, and when' for any

write operations (PUT, POST, DELETE) taken on the resources in your subscription. You can also understand the status of the operation and other relevant properties. References:
