NEW QUESTION: 1 Which key implementation mechanisms are responsible for ensuring that managed changes within the Operational Support Plan do not adversely impact the managed services?
A. change notifications, change triggers, and measurement of successful change
B. change assessment, change notifications, and change triggers
C. change assessment, change notifications, and measurement of successful change
D. change assessment, change triggers, and measurement of successful change
Answer: D

NEW QUESTION: 2 While attempting to discover the remote operating system on the target computer, you receive the following results from an nmap scan: Remote operating system guess: Too many signatures match to reliably guess the OS. Nmap run completed -- 1 IP address (1 host up) scanned in 277.483 seconds What should be your next step to identify the OS?
A. Run an nmap scan with the -v-v option to give a better output
B. Perform a firewalk with that system as the target IP
C. Perform a tcp traceroute to the system using port 53
D. Connect to the active services and review the banner information
Answer: D
Explanation: Most people don't care about changing the banners presented by applications listening to open ports and therefore you should get fairly accurate information when grabbing banners from open ports with, for example, a telnet application.

NEW QUESTION: 3 Which reason describes why ITIL is so successful?
A. It tells service providers exactly how to be successful
B. It is designed to be used to manage projects
C. It is not tied to any particular vendor platform
D. The five ITIL volumes are concise
Answer: C
Explanation: Explanation/Reference: Explanation:
