As far as you that you have not got the certificate, do you also want to take PT0-003 test, Even if you fail the PT0-003 exams, the customer will be reimbursed for any loss or damage after buying our PT0-003 training materials.

And you can choose the favorite one, You may be old but the spirit of [PT0-003](#) endless learning won't be old, Filter questions for a new practice, Maybe you will ask whether we will charge additional service fees.

NEW QUESTION: 1CE_PROJECTION(:table1, ["AMOUNT"], "'PROD" = A')**A.** Option B**B.** Option D**C.** Option A**D.** Option C**Answer: B**

NEW QUESTION: 2You work as the Project Administrator for company.com Inc. You need to create and schedule a new cube for your organization. While building the cube, what will happen if you enter the name of the database to be used by Analysis Services that does not exist already?**A.** You will not be able to approve the cube creation until a database connection is made.**B.** The database will be created automatically.**C.** The cube creation will fail in the queue until the database is created.**D.** The cube will not be created until the database is created.**Answer: B****Explanation:**When you enter the name of a database in the build cube section of Server Settings of a database that does not exist, the database will be created automatically. OLAP cubes are controlled on the OLAP Database Management page in the 'Server Settings' on a Microsoft Project Web App (PWA) site. The dimensions and measures of the OLAP cube can be configured by a user for Project Server 2010, or the user can configure the build settings of a cube. The parameters that can be configured on an existing OLAP cube are of two types as follows:1.Dimensions and measures2.Cube build settings Answer options A, B, and D are incorrect. These statements are not valid for the OLAP Cube and the related database settings. What is the Cube Building Service? The Cube Building Service is a reporting and analysis feature in Microsoft Project Server that allows a user to perform complex analysis of project data. It uses SQL Server Analysis Services to create an online analytical processing (OLAP) database containing several cubes that are used for data analysis reporting. It is administered through the Project Web Access Site Settings page. It allows for data cubes to be built from selections within the Reporting database.

NEW QUESTION: 3You have been assigned a project to develop a Web site for a construction company. You have to develop a Web site and want to get more control over the appearance and presentation of your Web pages. You also want to increase the ability to precisely specify the location and appearance of the elements on a page and create special effects. You plan to use Cascading style sheets (CSS). You want to apply the same style consistently throughout your Web site.Which type of style sheet will you use?**A.** External Style Sheet**B.** Embedded Style Sheet**C.** Internal Style Sheet**D.** Inline Style Sheet**Answer: A****Explanation:**Explanation/Reference:

Explanation: To apply the same style consistently throughout your Web site you should use external style sheet. Cascading style sheets (CSS) are used so that the Web site authors can exercise greater control on the appearance and presentation of their Web pages. And also because they increase the ability to precisely point to the location and look of elements on a Web page and help in creating special effects. Cascading Style Sheets have codes, which are interpreted and applied by the browser on to the Web pages and their elements. There are three types of cascading style sheets. External Style Sheets Embedded Style Sheets Inline Style Sheets External Style Sheets are used whenever consistency in style is required throughout a Web site. A typical external style sheet uses a .css file extension, which can be edited using a text editor such as a Notepad. Embedded Style Sheets are used for defining styles for an active page. Inline Style Sheets are used for defining individual elements of a page. Reference: TechNet, Contents: Microsoft Knowledgebase, February 2000 issue PSS ID Number: Q179628

NEW QUESTION: 4 You need to publish the ProseWare premium apps. What should you do? **A.** Create a new RemoteApp collection by using the Quick Create option. **B.** Create a new Traffic Manager profile. **C.** Create and provision a new ExpressRoute circuit. **D.** Create a new storage account. **E.** Create a new RemoteApp collection and assign the collection to an existing Azure virtual network. **Answer: E** Explanation: References:

<https://azure.microsoft.com/en-gb/documentation/articles/remoteapp-create-hybrid-deployment/> Topic 3, Blue Yonder Airline Overview Background Blue Yonder Airlines provides regional commercial jet services in the continental United States. The company also designs, manufactures, and sells custom parts for jet aircraft. The custom parts business is growing rapidly. Blue Yonder airlines has developed a new part that will help airlines comply with new safety regulations. The company has a backlog of customers that would like to purchase the part. The Sales department has 500 users and the Engineering department has 200 users. All employees work eight hour shifts. The Sales and Engineering teams cannot effectively collaborate on projects. This has resulted in missed deadlines for releasing new products to manufacturing. Mobile device management Blue Yonder Airlines has a subscription to Microsoft Intune for Mobile Device Management (MDM). The subscription includes the MDM Authority and Terms and Conditions components. The company has deployed the Network Device Enrollment service, Enterprise Certification Authority, and the Intune Certificate Connector. Blue Yonder Airlines has an on-premises Microsoft Exchange environment. The company will use a combination of Intune and Azure RemoteApp for Mobile Application Management. Mobile devices for employees Blue Yonder Airlines plans to deploy mobile devices to the Sales and Engineering department employees for use while they are outside of the company network. The company plans to deploy the latest iOS devices for Sales department users and Windows 10 tablet devices for Engineering department users. You configure a Sales group for Sales department users and an Engineering group for Engineering department users. In Intune, you configure a computer device group for Windows 10 devices, and a mobile device group for iOS devices. You synchronize the Sales and Engineering groups with Azure Active Directory (AD). Network resources You have a network file share that is used by Engineering department users to collaborate on projects. The file share is configured with full control permissions. The company is concerned that users may be disrupted if they are suddenly denied access to the file share. Applications Inventory Management App Blue Yonder Airlines has developed a custom inventory management app. Sales department users must be able to access the app from enrolled mobile devices. The data that the app uses is considered confidential and must be encrypted. New product Sales App You procure a third-party app from a vendor to support new product sales. The data that the app uses is highly confidential. You must restrict access to the app and the app's data to only Engineering department users. The app has been signed by using a Blue Airlines certificate. This certificate is not trusted by devices that run Windows 10. Product Request Program App The company has developed the Product Request Program app as a 32-bit Windows application. The application allows the company to manage the sales fulfillment process. It is also used to record customer requests for new parts and services. You

plan to publish the Product Request Program app in Azure RemoteApp and configure access for users in the Engineering and Sales departments. This app is not compatible with the iOS platform and cannot be published by using Intune. You create a virtual machine in Azure that runs Windows Server 2012 R2. You install the Product Request Program app on the virtual machine.

Business Requirements You must ensure that the Sales and Engineering teams can share documents and collaborate effectively. Any collaboration solution must be highly available and must be accessible from the internet. You must restrict access to any shared files to prevent access. You must restrict permissions to the Engineering file share. You must monitor access to the file share. You must provide users in the Sales and Engineering departments access to the following resources:

- *Corporate email
- *File Shares hosted in Microsoft SharePoint Online

The Product Request Program app Technical Requirements You have the following technical requirements:

- *Allow all Sales department users to enroll iOS devices for device management and enable encrypted notifications to the devices.
- *Employees must be able to access company resources without having to manually install certificates or using an out-of-band process.
- *Employees must only access corporate resources from devices that comply with the company's security policies.

Mobile device protection policies

- *All devices must include a trusted build and must comply with Blue Yonder Airlines password complexity rules.
- *You must clear all corporate data from a mobile device when the number of repeated log on failures is more than 10.
- *All devices must be protected from data loss in the event that a device is lost or damaged.
- *Data that is considered confidential must be encrypted on devices.

Additional technical requirements for Engineering department users and devices

- *Users must not be challenged for credentials after they initially enroll a device in Intune.
- *Users must be able to access corporate email on enrolled Windows 10 devices.
- *Devices must be automatically updated when an update is available. You must configure the Intune agent to prompt for restart no more than one time during normal business hours.

System restarts to complete update installations must occur outside of normal business hours.

Problem Statements Sales and Engineering teams report that it is difficult to share documents and collaborate on new projects. Blue Yonder Airlines has an urgent need to improve collaboration between the Sales department and Engineering department. Any collaboration solution must be highly available and accessible from the Internet.

Engineering department users report that Intune prompts them to restart their Windows 10 devices every 30 minutes when an update is available for installation. The prompts are disruptive to users.

Security issues The Blue Yonder Airlines Security team has detected a vulnerability in Windows 10 devices. Microsoft has released a patch to address the vulnerability. The Security department has issued a service announcement. They request that you deploy the patch to all Windows 10 devices managed by Microsoft Intune.
