**NEW QUESTION: 1**An organization has an Office 365 tenant and uses an Enterprise E3 subscription. You enable licenses for 1,000 users. You must implement a file sync service for users that meets the following requirements: Users must be able to sync offline versions of all files to local computers. The organization must be able to manage permissions for all files. You need to recommend a solution. Which solution should you recommend?  
**A.** SharePoint document libraries  
**B.** OneDrive  
**C.** Office Delve  
**D.** Distributed File System Replication  
**E.** Microsoft Storage Spaces  
**F.** Windows offline files  
**Answer: A**  
Explanation: Explanation/Reference: Explanation: You can work offline and sync within a SharePoint document library. The document library permissions can be managed by the organization. Incorrect Answers: A: Storage Spaces is a storage virtualization technology which allows the organization of physical disks into logical volumes similar to Logical Volume Manager (Linux), RAID1 or RAID5, but at a higher abstraction level. C: File permissions cannot be centrally managed with Windows offline files. D: The Distributed File System Replication (DFS) service is a state-based, multimaster replication engine that supports replication scheduling and bandwidth throttling.
