NEW QUESTION: 1HOTSPOT You need to implement the SendMessagesAsync method in the QueueManager class. How should you complete the relevant code? To answer, select the appropriate code segment from each list in the answer area. **Answer:** Explanation:

NEW QUESTION: 2 Role1を実装する必要があります。

Role1を作成する前に、どのコマンドを実行する必要がありますか？回答するには、回答エリアで適切なオプションを選択します。注：それぞれの正しい選択は1ポイントに相当します。 **Answer:** Explanation: Explanation

NEW QUESTION: 3 You work as a Software Developer for ABC Inc. The company uses Visual Studio .NET 2008 as its application development platform. You create an ASP.NET Web application using .NET Framework 3.5. You create an ASP.NET application by using the .NET Framework 3.5. You need to implement a means to monitor Service Level Agreement (SLA) compliance in the application. You are required to identify a method to enable perfect calculation of the time that all requests take to process. What will you do? **A.** Create and register a custom HttpModule. **B.** Create and register a custom HttpHandler. **C.** Use the WebHttpBinding class. **D.** Use the IRequiresSessionState interface. **Answer: A**

NEW QUESTION: 4 You need to ensure that the Twitter feed data can be analyzed in the dedicated SQL pool. The solution must meet the customer sentiment analytics requirements. Which three Transaction-SQL DDL commands should you run in sequence? To answer, move the appropriate commands from the list of commands to the answer area and arrange them in the correct order. NOTE: More than one order of answer choices is correct. You will receive credit for any of the correct orders you select. **Answer:** Explanation: Reference: <https://docs.microsoft.com/en-us/azure/synapse-analytics/sql/develop-tables-external-tables> Topic 2, Litware, inc. Overview Litware, Inc. owns and operates 300 convenience stores across the US. The company sells a variety of packaged foods and drinks, as well as a variety of prepared foods, such as sandwiches and pizzas. Litware has a loyalty club whereby members can get daily discounts on specific items by providing their membership number at checkout. Litware employs business analysts who prefer to analyze data by using Microsoft Power BI, and data scientists who prefer analyzing data in Azure Databricks notebooks. Requirements Business Goals Litware wants to create a new analytics environment in Azure to meet the following requirements: See inventory levels across the stores. Data must be updated as close to real time as possible. Execute ad hoc analytical queries on historical data to identify whether the loyalty club discounts increase sales of the discounted products. Every four hours, notify store employees about how many prepared food items to produce based on historical demand from the sales data. Technical Requirements Litware identifies the following technical requirements: Minimize the number of different Azure services needed to achieve the business

goals. Use platform as a service (PaaS) offerings whenever possible and avoid having to provision virtual machines that must be managed by Litware. Ensure that the analytical data store is accessible only to the company's on-premises network and Azure services. Use Azure Active Directory (Azure AD) authentication whenever possible. Use the principle of least privilege when designing security. Stage Inventory data in Azure Data Lake Storage Gen2 before loading the data into the analytical data store. Litware wants to remove transient data from Data Lake Storage once the data is no longer in use. Files that have a modified date that is older than 14 days must be removed. Limit the business analysts' access to customer contact information, such as phone numbers, because this type of data is not analytically relevant. Ensure that you can quickly restore a copy of the analytical data store within one hour in the event of corruption or accidental deletion. Planned Environment Litware plans to implement the following environment: The application development team will create an Azure event hub to receive real-time sales data, including store number, date, time, product ID, customer loyalty number, price, and discount amount, from the point of sale (POS) system and output the data to data storage in Azure. Customer data, including name, contact information, and loyalty number, comes from Salesforce, a SaaS application, and can be imported into Azure once every eight hours. Row modified dates are not trusted in the source table. Product data, including product ID, name, and category, comes from Salesforce and can be imported into Azure once every eight hours. Row modified dates are not trusted in the source table. Daily inventory data comes from a Microsoft SQL server located on a private network. Litware currently has 5 TB of historical sales data and 100 GB of customer data. The company expects approximately 100 GB of new data per month for the next year. Litware will build a custom application named FoodPrep to provide store employees with the calculation results of how many prepared food items to produce every four hours. Litware does not plan to implement Azure ExpressRoute or a VPN between the on-premises network and Azure.
