NEW QUESTION: 1Which answer best describes how you can start the Java-based version of the Node Manager?**A.** Wisifconfig.sh (.cmd in Windows)**B.** startNM.sh (.cmd in Windows)**C.** W1scontrol.sh (.cmd in Windows)**D.** startNodeManager.sh (.cmd in Windows)**Answer: D**
Explanation:Explanation/Reference:Explanation:Although running Node Manager as an operating system service is recommended, you can also start Node Manager manually at the command prompt or with a script.Use startNodeManager.cmd on Windows systems and startNodeManager.sh on UNIX systems.References:

NEW QUESTION: 2The resistance level of a stock is the price at which the technician expects:**A.** a substantial demand for the stock.**B.** an unstable trading volume.**C.** a substantial supply of the stock.**D.** the stock price to break out of the falling trend channel.**Answer: C**
Explanation:Explanation/Reference:Explanation:The resistance level can be thought of as a temporary ceiling on the stock price in the sense that if the price rises above this level, additional supply from investors trying to cash in will depress the price below the resistance level.

NEW QUESTION: 3Refer to the exhibit.After the power-on-self test (POST), the system LED of a Cisco 2950 switch turns amber. What is the status of the switch?**A.** Theswitch has experienced an internal problem but data can still be forwarded at a slow rate.**B.** The POST was successful.**C.** Theswitch passed POST, but all the switch ports are busy.**D.** Theswitch has a problem with the internal power supply and needs an external power supply to be attached.**E.** POST failed and there is a problem that prevents the operating system from being loaded.**Answer: E**
Explanation:Explanation/Reference:Explanation:
http://www.cisco.com/en/US/products/hw/switches/ps607/products_tech_note09186a0080125913.shtml Each time you power up the switch, eight Power-On Self Tests (POSTs) run automatically. POSTs check the most important system components before the switch begins to forward packets. When the switch begins the POST, the port status LEDs display amber for two seconds, and then display green. As each test runs, the port status LEDs go out. 1x is the first to go out. The port status LEDs for ports 2x through 8x go out sequentially as the system completes a test. When the POST completes successfully, the port status LEDs go out. This indicates that the switch is operational. If a test fails, the port status LED associated with the test displays amber.The system LED also displays amber.Not E.From Cisco IOS Software Release 11.2(8.5) SA6 onwards, the port and system LEDs both remain amber after a POST

failure. In the earlier Cisco IOS Software Releases, only the LEDs of failed linked ports remained amber.
