And our C-S43-2022 exam questions are famous for its good quality and high pass rate of more than 98%.

NEW QUESTION: 1 Refer to the exhibit. Which three actions should be taken to implement the vPC in the Cisco ACI fabric? (Choose three.)
A. Select individual switch profiles
B. Select common switch profiles
C. Select common interface profiles
D. Select a common vPC interface policy group
E. Select individual interface profiles
Answer: B,D,E

NEW QUESTION: 2 Your network contains a Hyper-V host named Host1 that runs Windows Server 2012. Host1 contains a virtual machine named DC1. DC1 is a domain controller that runs Windows Server 2012. You plan to clone DC1. You need to recommend which steps are required to prepare DC1 to be cloned. What should you include in the recommendation? (Each correct answer presents part of the solution. Choose all that apply.)
A. Run dcpromo.exe /adv.
B. Create a file named Dccloneconfig.xml.
C. Run sysprep.exe /oobe.
D. Add DC1 to the Cloneable Domain Controllers group.
E. Run New-VirtualDiskClone.
Answer: B,D
Explanation:
Explanation/Reference: Explanation: B: DCCloneConfig.xml is an XML configuration file that contains all of the settings the cloned DC will take when it boots. This includes network settings, DNS, WINS, AD site name, new DC name and more. This file can be generated in a few different ways. C: There's a new group in town. It's called Cloneable Domain Controllers and you can find it in the Users container. Membership in this group dictates whether a DC can or cannot be cloned. This group has some permissions set on the domain head that should not be removed. Removing these permissions will cause cloning to fail. Also, as a best practice, DCs shouldn't be added to the group until you plan to clone and DCs should be removed from the group once cloning is complete. Cloned DCs will also end up in the Cloneable Domain Controllers group. Make sure to remove those as well.

NEW QUESTION: 3 A. 0 B. 1 C. 2 D. 3
Answer: A
Explanation:
<http://docs.aws.amazon.com/STS/latest/UsingSTS/CreatingSessionTokens.html>

NEW QUESTION: 4 Which migration solution should you recommend for Project1?
A. From the Exchange admin center, start a migration and select Cutover migration.
B. From the Microsoft 365 admin center, start a data migration and click Exchange as the data service.
C. From the Exchange admin center, start a migration and select Staged migration.
D. From the Microsoft 365 admin center, start a data migration and click Outlook as the data service.
Answer: B
Explanation: Project1: During Project1, the mailboxes of 100 users in the sales department will

be moved to Microsoft 365. Fabrikam does NOT plan to implement identity federation. All users must be able to exchange email messages successfully during Project1 by using their current email address. During Project1, some users will have mailboxes in Microsoft 365 and some users will have mailboxes in Exchange on-premises. To enable users to be able to exchange email messages successfully during Project1 by using their current email address, we'll need to configure hybrid Exchange. A new way to migrate mailboxes in a hybrid Exchange configuration is to use the Microsoft 365 data migration service. The data migration service can migrate Exchange, SharePoint and OneDrive. Therefore, we need to start a data migration and click Exchange as the service to be migrated. Reference:
