At the same time, we also constantly upgrade our training materials, [VCE CCP Exam Simulator](#) We provide SAP Certified Associate - Low-Code/No-Code Developer - SAP Build actual study guide to help you pass the exam successfully, And this will help the candidates to handle the the basic knowledge, so that you can pass the C-LCNC-2406 exam more easily, and the practice materials is fee update for onf year, and money back gyarantee.

I passed the exam with a high score.

NEW QUESTION: 1A. Option CB. Option EC. Option BD. Option AE. Option DAnswer: A,D,E

NEW QUESTION: 2You need to recommend a solution for the voice mail traffic. The solution must meet the technical requirements.Which two configurations should you include in the recommendation? (Each correct answer presents part of the solution. Choose two.)**A.** A call answering rule**B.** A transport rule**C.** A dial plan.**D.** A server certificate**E.** A data loss prevention (DLP) policy**Answer: C,D**Explanation:* Scenario: Voice mail traffic between the telephone system and the Exchange Server environment must be encrypted.A: Use the EAC to configure Protected Voice Mail from authenticated callers - In the EAC, navigate to Unified Messaging > UM dial plans. In the list view, select the UM dial plan you want to modify, and then click Edit. - On the UM Dial Plan page, under UM Mailbox Policies, select the UM mailbox policy you want to manage, and then click Edit. - On the UM Mailbox Policy page > Protected voice mail, under Protect voicemail from authenticated callers, select one of the following options:- Click Save.**B:***In on-premises and hybrid deployments, you can configure a Client Access and Mailbox server to use mutual Transport Layer Security (mutual TLS) to encrypt the SIP and RTP traffic sent and received from other devices and servers. When you configure the dial plan to use SIP secured mode, only the SIP signaling traffic will be encrypted, and the RTPmedia channels will still use TCP, which isn't encrypted. However, when you configure the dial plan to use Secured mode, both the SIP signaling traffic and the RTP media channels are encrypted. An encrypted signaling media channel that uses Secure Realtime Transport Protocol (SRTP) also uses mutual TLS to encrypt the VoIP data.*When you're deploying Transport Layer Security (TLS) with UM, the certificates that are used on the Client Access server and the Mailbox server both must contain the local computer's fully qualified domain name (FQDN) in the certificate's Subject Name. To work around this issue, use a public certificate and import the certificate on all Client Access and Mailbox servers, any VoIP gateways, IP PBXs, and all the Lync servers.**Topic 3, Contoso Ltd**Overview General OverviewContoso, Ltd., is an aerospace engineering company that manufactures jet engine parts forvarious industries and government agencies. Contoso has an Exchange Server 2013organization.A partner company named Tailspin Toys has an Exchange Server 2010 organization.**Physical Locations**Contoso has two offices. The offices are located in Montreal and Chicago.Each office contains a data center:- --The Montreal and Chicago offices connect to each other by using a direct WANlink.All connections to the Internet are routed through the Montreal office.Most of Contoso's employees work from the Montreal office.**Existing Environment**The network of Contoso is configured as shown in the exhibit. (Click the Exhibit button.)The network of Contoso contains the following components:---Client

computers that run either Microsoft Outlook 2007 or Outlook 2010. Users who have a primary SMTP address that uses the contoso.com suffix. A retention policy that retains all email messages for 580 days and is associated to all users. - Six servers that have Exchange Server installed. The servers are configured as shown in the following table. - A data availability group (DAG) named DAG1 that contains all of the mailbox servers. EX5 is configured as the witness server for DAG1. A file server in the Chicago office is configured as an alternate witness server. DAG1 has Datacenter Activation Coordination (DAC) mode enabled. Requirements Planned Changes Contoso plans to implement the following changes: - Implement an organization relationship between Contoso and Tailspin Toys. - Move the mailboxes of all the members of the sales department to Office 365. - Evaluate Unified Messaging (UM) by conducting a small pilot in the Montreal office. Security Requirements Contoso identifies the following security requirements: - Ensure that the data in the Exchange Server databases cannot be read if a hard disk is stolen. - Prevent temporary employees from executing a Reply All or a Forward of any email messages they receive. - Prevent temporary contractors from changing the configurations of the user accounts for the users in the research and development department. - Ensure that all of the connections to Outlook Web App from the Internet use Extensible Authentication Protocol (EAP) protocols and Transport Layer Security (TLS) protocols. - Secure all of the email messages from the users at Tailspin Toys to the Contoso users. Ensure that all of the messages can be secured if the certificates at Tailspin Toys are issued by a trusted third-party certification authority (CA). Auditing Requirements Contoso identifies the following requirements for auditing mailboxes: - The manager of the legal department must receive a daily report by email that contains a record of all the eDiscovery mailbox searches. - Any access to a mailbox by a service account must be excluded from the daily report. Compliance Requirements All of the email messages in the Sent Items folder of each user in the marketing department of Contoso must be deleted automatically after 365 days. Office 365 Coexistence Requirements Contoso identifies the following Office 365 coexistence requirements: - Office 365 users must be able to access their mailbox by using their Active Directory user account in Contoso. - On-premises users must be able to share free/busy information and calendar information with the Office 365 users.

NEW QUESTION: 3 Click the Exhibit button. You administer AS 65000, and have deployed a route reflector (RR1) in your network as shown in the exhibit. The traffic between AS 65001 and AS 65002 is going through the route reflector, even though it is not the best path. What will solve this problem? **A.** Remove the nhs policy. **B.** Change the LOCAL_PREF so that it uses the preferred path. **C.** Change the originator to be the preferred path. **D.** Change the IGP metric so it is lower on the preferred path. **Answer: A**

NEW QUESTION: 4 When a Compliance Safety and Health Officer (CSHO) holds an inspection of a business, all of the following must occur during the inspection except: **A.** Tour of facilities **B.** Resolution of problem **C.** Opening conference **D.** Presentation of credentials **Answer: B**
Explanation: Explanation: During a CSHO inspection, the following should occur: the CSHO should present his credentials, the CSHO should hold an opening conference, the CSHO should tour the facilities, and the CSHO should hold a closing conference. It cannot be expected that the problem, if one is determined to be present, will be resolved during the inspection. A resolution is usually a followup result of the inspection.
