NEW QUESTION: 2 **HOTSPOT** You are developing an ASP.NET MVC 4 application that includes the following class. Line numbers are included for reference only. For each of the following statements, select Yes if the statement is true. Otherwise, select No. **Answer:** Explanation: Explanation Box 1: No Line 7 executes fine as Name is the string Contoso. Box 2: Yes The assertion of Line 16 fails as the Boolean expression `net| = 0` evaluates to false (`500 - 500` equals 0). Note: An assertion verifies an assumption of truth for compared conditions. The assertion is central to the unit test. The Assert class provides many static methods for verifying suppositions of truth. If the condition being verified is not true, the assertion fails. The Assert class throws an `AssertFailedException` to signal a failure. Box 3: No The Boolean expression on line 22, `balance >= 0.0f`, evaluates to `0 >= 0.0f` (true), as `balance` is set to `0.0f` at line 21, and because `Contract.Ensures` is a postcondition. Note: The `Contract.Ensures` method specifies a postcondition contract for the enclosing method or property.
